

So, we are going to do the remainder of our time together this morning--  
We're going to talk about some things we haven't talked about before

Again, everybody, just take a breath.....  
And just put yourself in receiving mode to listen....

So, we're going to talk about 2 elements that we have not previously focused on  
or given much attention to

So, just take another breath and be present.....  
Suspend any internal chatter and place yourself in receiving mode.....

**[1] The majority of scientists today agree that more than 99% of the Universe  
is composed of Plasma**, which is a cloud of charge.

Plasma permeates the entire solar system,  
as well as the interstellar and intergalactic environments.  
Yet, very few people are aware of Plasma or what it is.

When you observe the Milky Way, you are seeing luminous spheres of Plasma  
that are held together by their own internal magnetic field.  
And the nearest visible luminous sphere of Plasma to the Earth is our Sun.

So, in our group, we referred to Plasma numerous times  
in the creation of this beautiful Light Temple.  
That was done with intent,  
to begin to imprint your consciousness with the awareness of Plasma.

So, the time has now come for us to learn more about Plasma  
and what it means for *us* as Ascending Masters of Light.

So, technically, Plasma is considered to be the 4th state of matter.  
It's different from solids, liquids and gases.  
Plasma atoms are divided into free-floating 'negative' electrons and 'positive' ions.  
It is sometimes called an ionized gas.

However, gases and Plasmas are distinct states of matter.  
Plasmas display vastly different properties and complexities,  
which far exceed those in gases or other states of matter.

[2:27] Now this is what's important to us, so listen carefully:

When we reach a certain state of Consciousness on our Ascension Path,  
the human body begins to undergo an alchemical process  
that begins to generate *internal* Plasmic Light.

The internal Plasma is created by the energetic *conscious* force  
of increasing our Light Quotient, by integrating the many powerful Light Codes,  
Templates, and Energetics we've been given throughout the years.

This is why we've been building our Etheric Light Body structure for all of these years.  
So, this now allows for our higher consciousness Bodies,  
like our Epi-Kinetic and Eka Bodies, to function.

\* By directing our Soul Consciousness to connect to our body  
and connect our particles to Plasmic Light,  
electrons collect on the particles and start to create a Plasmic crystalline structure,  
that builds filaments,  
which connect and communicate with everything and everyone.

So, we are beginning to understand that Plasma,  
being the most common substance in our Universe,  
permeates through absolutely *everything* in creation.

We have just learned that Plasma creates filament-like strings  
that interconnect and communicate with all other things.

This is relative to attaining Coherence within the state of Consciousness.  
Plasma is the interface that communicates with the Intelligent Energy of all Creation.  
Our personal inner spark of Plasma is our direct interface to link  
with the massive Plasmic Core of the Universe,  
which then connects us to the Eternal Mind of Source.

Our Soul, our Spiritual Bodies, and Unified Field have been built  
and are energized and strengthened  
by the same core substance of Plasma,  
from which the entire Universe has been created.

Your Soul-Spirit is the Plasma power supply inside of your physical body.

[5:03] And as we have begun consciously embodying our Soul-Spirit and the Higher Consciousness Light patterns and Spiritual Blueprints that we have received, These frequencies are being imprinted inside our cells by passing through the Plasma membrane.

These Higher Consciousness Imprints energetically shift our awareness and transform who we think we are.

As the Energetics of these higher States of Consciousness are recorded into our physical being,  
It alchemically begins to transform the energetic density of our 3<sup>rd</sup>-4<sup>th</sup> dimensional bodies into the 5<sup>th</sup> Dimensional state, by replacing what is being transformed with quantities of biological Crystalline Plasmic Light.

This awareness of Plasma, along with the powerfully expansive Energetics that you will receive during this Light Conference, will exponentially set in play a chain of reactions.

We are blessed to be taught by and work with some of the most advanced levels of Interdimensional Light Beings that possess the highest states of Multidimensional Consciousness in the Universe.

Now that we have a better understanding of Plasma, these beautiful advanced Plasmic Beings of pure Radiant Light will be able to connect and communicate with us at a much deeper level.

They are here to exemplify that by remembering who we are as a Soul Spirit, created in the Image of the Prime Creator, and by re-connecting into the Universal Plasmic Source, and learning to re-build and embody our Plasmic Light Body,  
It is the Key to ascending into higher and higher States of Consciousness.

Take another deep breath.....

So, while this has been only an introduction to Plasma,  
you have just received a massive Stream of Light-Coded information.

So, let's take a moment before we continue..... [Pause]

[8:08] So, let's add a little more.

[2] Because all Plasma domains travel in donuts, they have the form of the Torus.

Torus Fields have always been generated in the forms of Plasma Fields.

Plasma Fields choose to manifest themselves in this profound toroidal form, because  
it had to find a recursive geometry to become self-sustaining and self-organizing.  
And the Torus IS self-organizing and inherently knows how to create order from chaos.

The Torus is the self-regulating primary pattern that supports all life forms.

So, the Torus, therefore, is the oldest known structure in existence.

And without it, nothing could exist.

Toroidal Energy Fields exist around everything: humans, trees, the Earth, the planets,  
the Sun, the Solar System, the Galaxy, and the Universe.....

The Toroidal shape is similar to a donut but rather than having an empty central "hole",  
the topology of a Torus folds in upon itself  
and all points along its surface converge together  
into a Zero-Dimensional point at the center called a Vertex.

Now, we know that space in the Center is not an empty hole....

That is where our Central Column flows.

The Torus is the geometric shape  
used to describe the self-reflective nature of Consciousness.

The Torus allows a Vortex of Energy to form,  
which fills back along itself and re-enters itself.  
It turns itself inside-out continuously, by flowing back into itself.

The Energy of a Torus is consciously being refreshed.

In the movie *Thrive*, Nassim Haramein and others  
depict the tube Torus with external vortexes.

They speak of the White Hole as an emitter  
and the Black Hole as an absorber.  
And the Zero Point in between the two vortices is a tiny space of no-thing.

[10:41] So, our Hearts emit Energy in the form of a Torus.  
The body sits within a Toroidal Field  
which grows as we expand our awareness and consciousness.

The majority of humans have a small, slowly moving Toroidal Field.  
For our group, your Toroidal Field, which is also known as your Aura and Unified Field,  
is huge.  
And it expands exponentially as we embody more Light and Light frequencies.

Let's take a look at a video and then some graphics to give you a visual of what is occurring.

[Melainah posted pictures of the Toroidal Field on our computer screens  
while she was giving the following explanation.  
To see these or similar pictures, you can watch the video recording of our Conference,  
and-or you can use the video links above, or simply google "Tube Torus"]

As you know, the Heart is the first thing that forms in the human body.  
And then it begins emitting this Energetic Field, which is actually a Torus.  
And, then as the body grows and you grow,  
of course, this Field gets bigger and bigger.

And so, for many people who are still asleep,  
this Toroidal Field does not grow very much beyond this.  
They may come out and be very close to the body.  
They may have a very small Energy flow.

Now, those of you, because you've been doing this work for so many years,  
yours has grown and grown.  
And so it goes out and it goes.....  
and it comes in .... it goes out.... and it comes in.... it goes out and it comes in.....

So, it is a massive, massive Field that you grow.  
And every time we learn and bring in a new piece, it grows even more.

I'm going to change this graphic here to give you an idea of where we are today.  
What your Toroidal Field looks like today. Isn't that something!  
That's how beautiful and dynamic *your Energy Field* is.

[13:05] And, we know, because we draw from that Cosmic Energy,  
through the Center Column  
that Energy comes in through that Center Column and down and out and around.

And then we also draw from the Christed Matrix at the Center of the Earth,  
which also goes up....  
goes through that Heart Center Torus....  
and then also goes in and out and in and out.....

So, this is a little bit of a visual.

And I want to show you one more thing before we go to that next piece.

Here's a Torus.

So, this Energy is always moving in this form.

And inside of the Torus, inside the Energy is still spiraling inside of there.

Another thing that happens, particularly when we enter a state of deep meditation  
and we definitely are centered in ourself,

Then there is this ability that happens  
that we can actually collapse this whole Field in on ourselves.

And this collapsing is non-destructive.

It doesn't destroy.

It doesn't affect anything.

But this is how a Spirit would learn who we really ARE.

So, this is things that are always flowing.

We have our Field going in and out....

or maybe in this way [Usual Toroidal Field]

But then when we get into these deep processes,

this is what's actually happening in your Field [Field collapsed inward on ourself]

Now, this Toroidal Field has been moving for us forever,  
because it's how our Energy flows through our body.

But we have not put our attention on it  
through the course of the things we have been doing.

So, I think that's what we will do now.
