

Through Joan:

We ARE the Council of Twelve and have come to facilitate this Session, which continues to upgrade the physical body and the body's consciousness. The first step in this process is to present some basic concepts of what has to be achieved in relationship to the Electrical charges that have been transmitted previously and are presently coming in with all of the upgraded Energetics that we have presented to you.

This Session is mainly about the upgraded concepts that we will present today and also plant the seeds of the massive energetic influx that will be transmitted over the next two weeks. This is so that you can slowly integrate them before we begin to work with and expand them in our next Session. You will find this type of process helpful as we move forward and transmit Energies that bring you from the 5<sup>th</sup>, 6<sup>th</sup>, 7<sup>th</sup> Dimensional state for the physical body and into 8<sup>th</sup> Dimensional state of Consciousness.

The Electrical-charged Energetics that are now being used have to be monitored so that they are used correctly.

The Lords of Light that are within the Cosmic Streams of Consciousness that are part of this Council have been closely monitoring every upgrade that has been made since the beginning of the Ascending Masters teaching Sessions. You have received these energetic upgrades and began to integrate them very diligently. So, it's time now to present to you some information about what has already been anchored in the energetic system of each one of you.

The new monitoring system placed in your Field is called the Deca-Delta Manifold system. This Manifold system establishes organized procedural processes that are being transmitted in establishing matter-energy relationships.

The Deca-Delta Manifold contains different aspects of a Manifold that monitor the flow of Energies as they enter the brain's system. They also monitor how much is in play now in the 3<sup>rd</sup> and 4<sup>th</sup> Triads. The Deca-Delta Manifold regulates the flow of Light, Electrical charges, flow of Magnetic impact, and stays within the parameters of what is desired in the 5<sup>th</sup>, 6<sup>th</sup>, 7<sup>th</sup> Dimensional Light Template.

This Manifold is not just a regulator of different types of Light that are brought into the Unified Field of Consciousness of the individual creator. But it provides a continual upgrade of all refined expansions that are available to be received as the individual Consciousness and human body and especially the brain is capable of receiving.

C: Council of Twelve Teaching ---- Deca-Delta Manifold

[3:48] Until the individual is energetically prepared, they are held in Holographs to be transmitted when the Consciousness and the physical body is receptive. Then they are transmitted from the Holograph in a specific order into the Manifold to be distributed as needed.

The Deca-Delta Manifold acts as a filter to screen out the distorted versions of thought and emotions that emanate from the 3<sup>rd</sup> and 4<sup>th</sup> dimensional paradigms. This prevents them from being continually cycled through the physical brain and manifesting in the Mental-Emotional body and creating a fracture.

This Manifold receives the new Energetics which are present as Light Particles that can easily be used in the physical body. These Light Particles then produce Liquid Light and the Golden Nectar that are used in the fluids of the body to alter many physical, alchemical processes. The Golden Nectar Light is used to feed the neurons of the neurological system. The neurons become revitalized into new neurons that contain the upgraded Light Particles.

Take a deep breath.....

Before we continue on with more upgrades of the 4<sup>th</sup> Triad, let us talk about the physical brain. The brain can be compared to a massive computer. It is vital. Without it, the body dies. Without the upgrades that we have been putting in play, the body degenerates and ceases to function. The complete Triadic system is upgraded by altering the entire system of the physical body to stop the degenerative program that came along with 3<sup>rd</sup> and 4<sup>th</sup> dimensional time sequences. The new upgraded system interferes with the degenerative program and institutes new programs.

We are comparing now the brain to a computer because you can understand that. It's something that you have used every day for a long time. When certain upgrades are transmitted into your energetic system, you could compare them to installing software. You are rewriting the coding, upgrading the software, or replacing it altogether.

Now, let us proceed with a discussion about the Triadic system.

Another deep breath.....

Present in the moment.....

Each of the five Triads are Ascension Vortexes. They show you how to create precisely from your Christed Mind that is merged with your Higher Mind as well as the Creative Mind of Source that pertains to the physical realms.

This process raises the body out of the 3<sup>rd</sup> and 4<sup>th</sup> dimensions into a 5<sup>th</sup> Dimensional sequence.

C: Council of Twelve Teaching ---- Deca-Delta Manifold

[7:43] The 5<sup>th</sup>, 6<sup>th</sup>, and 7<sup>th</sup> Dimensional Light Templates play a vital role in your Ascension Journey. The 5<sup>th</sup>, 6<sup>th</sup>, 7<sup>th</sup> Dimensional Light Templates along with the Deca-Delta Manifold system monitors the upgraded Energetics that are coming into play. This Manifold system does not diminish the upgraded Energetics but monitors them as to how they flow into the brain system and become usable without short-circuiting any part of it.

As you know, the 4<sup>th</sup> Triad that we are upgrading now is composed of the 9<sup>th</sup>, 10<sup>th</sup> and 11<sup>th</sup> Chakras. The 9<sup>th</sup> Chakra contains communication channels that connect you to your various Master Teachers, the Lords of Light, the Elohim, the Archangelic Realm, and various Star Gates. This is accomplished through the Axiatonal channels that you have known about for some time. We will expand on these channels in a while.

The 10<sup>th</sup> Chakra is a refined level of the Universal Mind of Source, the Christed Mind, and Christed Oversoul. The 11<sup>th</sup> Chakra is in your individual 5<sup>th</sup> Dimensional Ka Body that you can draw from and use in a differentiated way to create form within form.

Each of these Triads are designed to work together because they are one massive Hologram that can draw from any segment of a specific Holograph. The 2<sup>nd</sup> Triad often draws from the 1<sup>st</sup> Triad or any other Triad to complete its process of creating form within form.

Sometimes upgrades in one Triad pertain to the upgrade of another Triad. This is the case of the 4<sup>th</sup> Triad upgrade, because it is all about Electrical charges that are being used to expand various segments of the human body. When the 4<sup>th</sup> Triad is functioning in a 5<sup>th</sup> Dimensional sequence, it is a massive Electro-Magnetic Vortex.

Deep Breath.....

We would like to talk about what makes up this unified Electro-Magnetic Vortex and what upgrades take it out of the realms of the 3<sup>rd</sup> and 4<sup>th</sup> paradigm.

Let us begin with the upgrades of the Medulla Oblongata.

In the 3<sup>rd</sup> dimensional reality, the Medulla Oblongata is used to control the autonomic function of the physical body such as breathing, walking, directing the heartbeat, transmitting the blood into different organs, and so on -- all of the things it does that you do not think about or start.

Now, in the 5<sup>th</sup> Dimension, the Medulla Oblongata is an Ascension Energetic Chakra that functions in a spinning Vortex of Light. It is an Electrical Chakra that contains within it massive amounts of Electrical charges that are used in specific ways. These charges have an autonomic function in that they contain within the Chakra a Manifold system that regulates how much of an Electrical charge is needed for a specific use. It is the end use of the creative charge that is always energetically monitored before the Medulla Chakra transmits an Electrical charge into specific areas of the physical body or the body's Unified Field.

C: Council of Twelve Teaching ---- Deca-Delta Manifold

[12:21] The built-in Manifold of this Chakra regulates the Light, the flow of the Electrical charges, and the flow of the Magnetic impact, so that they stay within the parameters of what is contained within the 5<sup>th</sup>, 6<sup>th</sup>, and 7<sup>th</sup> Dimensional Light Templates.

It's a vital function of the 2<sup>nd</sup> Triad. It assists the 3<sup>rd</sup> Triad to operate automatically. It is the key component to create the Arc of the Covenant. The upgraded activation of the Medulla Oblongata unifies the left and the right hemisphere of the brain.

The Arc of the Covenant was activated by the Electrical charges coming from the Medulla Oblongata Center.

This whole complex of Energies carries Electrical charges that must be balanced and be in symmetry with the new Magnetics that are being created continually as these upgrades take place. These continual energetic expansions are vital to changing the 3<sup>rd</sup> dimensional body into a body that is able to anchor a more complex Light Body.

The Arc of the Covenant begins to function in an accelerated way because of the regulatory process of the Manifold system which eliminates extreme Electrical charges from short-circuiting the valuable parts of the brain.

Many of the concepts that were given to you in the beginning Teachings are starting to energetically activate. You had the concepts but not all of the Energetic Templates that actually put the 5<sup>th</sup>, 6<sup>th</sup>, 7<sup>th</sup> Dimensional system in play.

You needed a fully charged and upgraded Medulla Oblongata to come on line first.  
The Deca-Delta Manifold had to be operative so that no parts of the multifaceted system would be short circuited.

All of these massive Electrical charges are held within the 4<sup>th</sup> Triad, as is the Deca-Delta Manifold, so that all the streams of Electrical charges used in the brain as it processes refined streams of thought are regulated.

Upgrades in the Arc of the Covenant continue to manifest with this arcing Energetic. They come along with the upgrades with the 4<sup>th</sup> Triad.

One of those upgrades in the Arc of the Covenant is that the Arc is now extended and encompasses the Unified Field and the field that is around your physical body. Take a deep breath and notice how that Field, your entire Unified Field, is surrounded by this glowing, Golden Arc!.....

The arcing Electrical Field will permanently draw from the 4<sup>th</sup> Triad more Electrically balanced charges. As the Consciousness grows, the arcing field will expand and the charges constantly amplify.

[16:51] Now let us return to some of the upgrades that took place in our last Session,  
so that we can weave them into the upgraded functions of the 4<sup>th</sup> Triad.

We will begin with the Color Codes.

The Indigo Color Code that was activated some time ago came on line to set a pathway for the Light Prism to be received.

The Electrical charge of that Code ignited a Flame in the Pineal and in the Sacred Heart Chakra. The Flame in the Pineal and the Sacred Heart were merged, so that the brain would begin to create thoughts that were based in the Sacred Heart Consciousness and in the Element of Love.

Later that Flame was upgraded to the Magenta Color Code, which adds a Magnetic Energy that balances the Electrical charge of the Indigo Blue Color Code.

The 6<sup>th</sup> and 7<sup>th</sup> Dimensional Light Templates are now seated in the Sacred Heart Center.

Now that they are in play and available, these Templates bring with them various Color Codes and Sounds that create Equilibrium, Balance and Symmetry within the Electro-Magnetic Field of the body. When the energetic system is balanced within a field of equilibrium and symmetry, the various Electrical charges that come into matter in various Color Code applications are tempered.

Let me repeat that: When the energetic system is balanced within a field of equilibrium and symmetry, the various Electrical charges that come into matter in various Color Codes and Color Code applications are tempered.

Now, this brings us to the Light Prism that was transmitted from the Source Realms in our last Session. We now begin to interweave it into the current upgrades.

Light Prisms refract Light, so that it breaks up into rainbow colors. Refraction is the bending of a Ray of Light, as it passes obliquely from one medium into another in which its speed is different.

The Light Prism contains all of the Light, Color and Sound Codes that are already in it. It is brought through the Center Channel of the body and anchored in the 1<sup>st</sup> Triad.

It affects the Seed Crystals that are a part of the head and brain.

[20:33] The Prism of Light that you received provided an autonomic function to the Color and Sound Codes that could be used by each individual as they created with the 2<sup>nd</sup> Triad.

There would be no need to activate a specific Color Code because they now act as a coherent unit to provide the exact amplification to your Intention as you use it in the 2<sup>nd</sup> Triad.

You would not have to be concerned about whether an Electrical charge would short-circuit the pathways of communication that are located within the brain's system of processing refined streams of thought and information.

The Magenta is the 8<sup>th</sup> Color of the rainbow. And the Magenta Code is not linear but circular. It brings the body into a 5<sup>th</sup> Dimensional state that is stable and coherent. The Magenta Color is then usable in the body as a 5<sup>th</sup>, 6<sup>th</sup>, 7<sup>th</sup> Dimensional Color Code. The Magenta Color Code affects the physical body, the Mental-Emotional body, as well as the Spiritual Body. The Magenta Coding is both Electrical as well as Magnetic. It contains all Color Codes. And it has a dynamic effect on all parts of your being.

If you are using the Light Prism and Color Codes for a specific purpose to heal some part of your body, you can also use a specific Color Code as well as the Light Prism to intensify the energetic effect in any particular part of your physical body or your Mental-Emotional Body. You can draw forth a specific Color to amplify your creation.

There is no limitation to your creative power now.

Take a deep breath and be present in this massive Unified Energetic Field that we have just created.....

It was a lot of information and concepts. But along with those concepts came a series of Energetics that will gradually be able to be utilized and integrated somewhat within the next two weeks, before we meet again.

These concepts that we have just presented to you not only affect your physical body, but they affect your Mental-Emotional Body dramatically. And this is important for you to realize, because many, during these times of great change in your physical environment, are under a lot of mental-emotional stress, because many things are changing in your life, because of the Energetics that you are now integrating.

[24:34] Allow these changes to come into being and trust that everything is in order for your Ascension.

You have the tools that are needed.

You have the concepts, the Energetics that will move you forward very quickly, now.

So, take a deep breath and be present in this moment.

And let us sit together in this beautiful Field of Energetics that is coming into being.

Be open, receptive.

Be aware of your Crown Chakra being wide open and anxious to receive.....

We will sit for a moment together and receive.....      [Long Pause]

Another deep breath.....

Very present..... Anchored in your body..... Aware.....      [Pause]

We will now turn this segment of our Session over to Melainah.....
