

It is I, Master Kuthumi.

I present myself to you, today, as the Chohan of the 2nd Ascension Ray.

I AM a Stream of Collective Consciousness

that is part of the Twelve Streams of Consciousness of the Council of Twelve.

Many humans have great difficulty comprehending this statement

without relying on the individual expression of me as Master Kuthumi.

I will organize the Stream of Energies coming into your field at this time

so that the massiveness of the Consciousness of the 2nd Ray can be better known.

These stepped-down Energies enable you to receive this Teaching easily.

We will not be compressing the Teachings like this when you enter your 2nd year with us.

By then, we, as the Council of Twelve, anticipate that you as a group

will have integrated into your Energy Field

the Energetic principles that were given to you in this last year.

If you can do this, you will have attained a different State of Consciousness.

You will then be able to learn the concepts and integrate the energetic magnitude of them
as we present them to you.

This is where you must follow us into this vast Collective Energy,

from where each of you emanated eons and eons ago,

when your Spirit was created as an individual creator.

After the fall of consciousness, you could not come into the immensity
of the Image and Similitude of Prime Creator.

You could not understand nor grasp that you were created in the Image and Similitude
of Source, because you could only relate to your human body with all of its frailties.

This is beginning to change, as you proceed with these Energetic Teachings.

The magnitude of who you are will not be fully comprehended & integrated for some time.

By the end of this series of Teachings, you will have more than just the basics.

You will have a Collective Consciousness at your disposal in a different arena

for your Soul-Spirit to fully embrace the completeness

of who you ARE as an individual creator in form.

This session will be an adjunct to Master El Morya's presentation

of the Quadratic Energetics that were configured in a massive Hologram.

This Teaching will carry the same Energetic impact.

However, the concepts presented will be about what is needed in the beginning stages

of your awareness of Self as the individual creator in a human form.

[3:26] We will present the Teachings and the Energetics of the 5th Element of Love
in an elementary way,
so that you can have an uncomplicated understanding of this immense Element.

You already have a basic awareness of this Element.
And you know that it has nothing to do with the emotions of love
or the feelings of love for another.
It is actually an *enormous* Power of Creative Energy.

It is more creative than the physical Elements of Fire, Water, Air, and Earth Energies.
You also know the massive effects of the Elements
because of what is transpiring in your world now.
And these present Elements are designed to clear the Earth in certain areas
as well as to change the human Consciousness of those who reside in those areas.

The Creative Energies required to rebuild these areas will be presented
in a different State of Consciousness.
Those who actually pay attention will see that their reaction from the way
that they would previously respond to such events cannot be used.
There is a Knowing that they are not a victim
and that they have a creative pathway that is open to them.

Take a deep breath..... Be very present in this moment.....

Now, let us talk about the 2nd Ascension Ray -- the 2nd Ray of Love and Wisdom.
This powerful Creative Energy of Prime Creator is now available to you
in the Image and Similitude from whence it came.
It is presented to you as an individual creator in this exact form.
This is very hard for the human brain to process with any accuracy.

You must step out of the language term of the Element of “Love”
and begin to use the unlimited Creative Force within the Creative Mind of Source.
This Energetic is stepped down through the 2nd Ray of Creation
in ways that it can be used by individual humans
when their State of Consciousness has been prepared to receive it.

The human body must be firmly seated in 5th Dimension.
You must also have use of your Epi-Kinetic and Eka bodies
to travel with Ease through 5th, 6th, 7th Dimensional States of Consciousness.

[6:44] Let me repeat that!

This is a very important concept that you need to really get in your Consciousness:

*Step out of that Element and language term, the language term of the Element of Love.
And begin to use the unlimited Creative Force held within the Creative Mind of Source.*

This is a LOT for you to comprehend!

*This Energetic is stepped-down through the 2nd Ray of Creation
in ways that it can be used by the individual human
when their State of Consciousness has been prepared to receive it.*

*The human body must be firmly seated in the 5th Dimension.
You must also have use of your Epi-Kinetic and your Eka bodies
to travel with Ease through the 5th, 6th, and 7th Dimensional States of Consciousness.*

You will then be able to create accurately with the stepped-down version
of your *enormous* Creative Force that is held within you.

Take a deep breath.....

And take this in... to your Consciousness, your conscious awareness..... [Short Pause]

From this time forward, we will cease to call the 5th Element the Element of Love.
We will call it the Massive Creative Consciousness of Source.

You cannot equate the 5th Element with any other physical Element.
It is not a physical Element.
It's a state of consciousness.

This will help you tremendously, because you have always related the 5th Element
with an emotion or feeling that is present.

In this Session,
we are asking you to receive it through the 3rd Triad,
process it through your Higher Mind,
where it is received in the 8th chakra through the Creative Mind of Source,
and stepped down and positioned in your Higher Mind.

Open yourself to this process of receiving the stepped-down version
of the Creative Mind of Source that relates to creating in matter.

[10:08] You cannot use the entire unlimited Creative Consciousness of Source,
but you can draw from it
in certain frequencies of Creative Energetic Streams of Consciousness
that can be used in the creative process of manifesting form within form in perfection.

These Streams of Energetics apply to your Intention for specific creations
that you will be manifesting through the 2nd Triad.

You will also be drawing Streams of Energetics of the 11th chakra that is in the 4th Triad.
This Energetic has an electrical charge that is monitored through the Deca-Delta system
so it is used precisely and accurately
in the way that is needed to exemplify the Christed Mind of Source.....

At this present time,
when you create with your Higher Mind that is merged with the Higher Mind of Source,
the appropriate Streams of Consciousness that emanate from the 5th Element
are then added to your Intention.

You are unable to fully comprehend the Creative Consciousness of Prime Creator,
but you *can* draw from it and use it.

More understanding of this Creative Force that you were created in,
as the Image and Similitude of this *immense* Force,
will come after the 2nd year's Teachings.

As you apply these vast Energetics to your creations,
you will become more familiar with how these Creative Energies contribute
to your creations and perfected manifestations.

Let me now give you some added information about the 1st Iterations of the 5th Element.

The 5th Element, when it was first received by humans,
became known as the Element of Love,
because it had a purpose in the 3rd and 4th dimensional state of consciousness.

The purpose of calling it the Element of Love
stimulated an awareness in your Heart Chakra and also in your Sacred Heart center.
You had to *feel* the Holy Presence of Source.
You had to feel gratitude for the Love that is within the 4th chakra
as it relates to a human as a Soul-Spirit.

[13:16] The open Heart Chakra was a primary foundational concept
because an understanding has to be present
before you can move into the Image and Similitude
of the Creative Force of Source's Prime Element of Creation.

You must have a State of Consciousness that tells you
that you are a valued individual creator in form
and that you were created in that Image.

Prime Creator does not create anything that is unlike itself in any way.

The 5th Element is the only Element that Prime Creator needs or uses.
It's only the human iteration that needs further examples
through Earthly Elements such as Air, Water, Fire and Earth Energies,
so that the human can create form within form.

In order for you to begin to use the 5th Element of Creation,
your Higher Mind must function
in the 5th Dimensional State of Consciousness,
merged with the Massive Creative Mind of Source.

You've already merged your Higher Mind with the Creative Mind of Source a while ago,
so, know that that is done.

All that you have to do now is

- [1] Place your attention on your Higher Mind
as it is merged with Prime Creator's Creative Mind.
- [2] Next move your Higher Mind into your Soul Star's massive Vortex of Creative Energetics
that emanate from your Spirit, as it was created as an individual creator in form.

That energetic communication is directed from your Spirit,
at appropriate times and increments,
to your Soul that was manifested to experience the creative principles in form.

- [3] This information is then transmitted through the Center Channel of your body
and anchored in the 1st Triad,
which is already spinning at the refined velocity
which you created in the last two Sessions.

This rotation is a magnificent rotation of Energies that envelope your entire Unified Field
in ways that have a significant impact on your Consciousness.

As this communication is received by your Soul
and is anchored in your Sacred Heart center of the 1st Triad,

- [4] It's drawn into the 2nd Triad
and used to benefit the escalation of the makeup of the human body,
bringing it into a 5th Dimensional Body.

[16:42] This creative action helps your Light Body to take on
a more refined frequency of Light
and knowledge that is made usable as we proceed in these Teachings.

This State of Consciousness alone brings Wisdom with it into your awareness.
There is a Wisdom drawn from your Spirit, as it communicates through your Soul.
The Soul communicates to you in your present state of body.

There is a Wisdom that is contained within you now that is within your Sacred Heart center
and is also within the Magenta Flame that burns brightly.

This Eternal Flame is also merged within your Pineal center.
This center is you as Spirit, as the individual creator
that has Wisdom and Seeing in ways that you had not considered.
The Image is set in your 3rd Eye,
which is the reflection of the all-Seeing Eye and All-knowing Eye of Prime Creator.

The two Magenta Eternal Flames bring the Wisdom and Consciousness
out of the Sacred Heart center and merges it in the Pineal.
Your Sacred 3rd Eye is used for
processing concepts and states of Consciousness through the brain
and manifesting them in form.

This is a LOT that I have just said to you.
Here again, it is a massive Energetic Stream of Consciousness.

So, let me repeat this!
Take a deep breath.....
Very present in this moment with me.....

The two Magenta eternal Flames bring the Wisdom and Consciousness
out of the Sacred Heart center and merges it in the Pineal.
Your Sacred 3rd eye is used for
processing concepts and states of Consciousness through the brain
and manifesting them within form.

You must practice, practice, and practice,
so you become familiar with these Streams of Consciousness and terminology.....
