Triadic System

The Triadic system alters the energetic function of the chakra system. It is the unifying principle of the entire chakra system, both physical chakras and non-physical chakras. This enables the individual to experience life in a body through a spiritually based conscious awareness of self.

The Triadic system is composed of 5 energetic channels.

1st Triad is the base that holds the entire system. It relates to how the system is used in the physical realm to experience the individuality of a soul. It alters the soul experience. The soul becomes conscious of its unity with The All That Is and that it is a multidimensional being of Light.

2nd Triad Is the creative center of the soul that is experiencing life in a body. The soul then draws into this center the undifferentiated creative Light of Source energy that is within the First Ray of Creation. It is then compressed it through the Second Ray of Creation where it becomes differentiated and applied and used in the physical world.

3rd Triad Anchors the Divine aspects of Soul/Spirit. It is the bridge between physical and non-physical Source Realms. It is the receptor channel for higher Light frequencies that alter states of consciousness.

There is a bridge between the 3rd and 4th Triad that creates access to from the physical creative realms to the non-physical cosmic realms. This bridge is a beautiful multidimensional thousand petal Magenta Lotus.

4th Triad is the communication channel. It has the capacity to transmit Light as well as receive refined Light frequencies

There is a bridge between the 4th and 5th Triad that creates access to from one creative realm to a full knowing of Christ Consciousness that is within a vast cosmic realm. It is often referred to as the Rainbow Bridge of the Antakarana Bridge.

5th Triad is pure Christ Cosmic Consciousness
