

## Ascending Masters of Light Session 6 April 3, 2022

### Community Call

### Building group resonance

Be aware of yourself as your Lightbody.

Be aware of yourself within your Merkaba vehicle of light.

Set you frequency to 130% light.

Let us travel to Lake Balboa. As you near the lake you will once again see the radiating Etheric Crystal as well as our 12<sup>th</sup> dimensional magenta diamond, sitting just inside the center.

As you pass through the center of the magenta diamond, say hello to the 4 Archangels who are holding the gateway open for us to enter.

Continue into the multi-dimensional matrix of the Etheric Crystal to the place of our Light Temple vortex.

On arrival, let us gather as a collective at the base of the ascending crystalline steps.

Increase your frequency to 135% Light.

1.... Be in your divine sacred heart and ascend to the first step.

Know yourself as the full expression of your 5<sup>th</sup> dimensional Lightbody and unified field.

2... Ascend to the 2<sup>nd</sup> step and allow the frequency of the light codes that are you, to increase to 140% Light.

Bring the fullness of the 5<sup>th</sup>, 6<sup>th</sup> & 7<sup>th</sup> dimensional codes from the light templates into present time.

3...Ascend to the 3<sup>rd</sup> step.....increase your light quotient to 145% Light.

Amplify your unified field and all your light codes by expressing your prime directive with an "I Am ....." Statement.

4....Ascend to the 4<sup>th</sup> step.....stabilizing all the energetics now streaming through you, as you increase your light frequency to 150%.

5.....Ascend once more to the top.

Proceed through the entryway to the crystalline bridge with the tranquil sacred waters running beneath.

Continue and enter our gathering chamber.

Go to the seat that you chose during the unveiling.

Take a moment to settle and make yourself comfortable. Feel the contouring of your seat to your Lightbody

Breathe in the purity of this magnificent environment.

Be sure your light frequency is holding at 150%.

We have been together as a group for a number of years and have established resonance and unity within our collective.

Our new goal is to now begin building coherence and resonance as a collective in the higher, more refined frequencies of the 7<sup>th</sup>, 8<sup>th</sup> & 9<sup>th</sup> dimensional frequencies.

To assist us in achieving this goal, the Council of 12 and the Creator Beings of Light, are gifting us with a new energetic Light pattern.

Be centered in your Sacred Heart.

Together, let's create a group intention: that each member receives precisely what we individually require to bring us into harmonic resonance as a collective in these higher levels of Light.

The only thing you need to do as we proceed is to allow yourself to be in receiving mode.

Place your awareness up near the ceiling, where you will see a bright light. From that light you will be able to see the bands of Light frequencies begin to spiral continually down, from smaller to increasingly larger counter-

clockwise rings, which will continue to flow one after another throughout this process.

When the first spiral of light reaches us, the color of the spirals will change from white to that beautiful shade of aqua marine blue.

Open to receive the beautiful uplifting color codes and the increased harmonic unity codes.

The Light will enter into our Lightbody on our left and flow through us and out to the right to the Light being sitting next to you.

Once one spiral makes a complete loop through our group, it will continue moving beyond our circle to begin the spiraling ascent back to the Light source at the ceiling to begin again.

Although I am breaking this process down step by step for better clarity, do understand that once the spirals of Light reach us they will be continually moving through us.

We will sit quietly together for a minute or two, as we are bathed in this beautifully color coded, spiraling torus vortex of refined Light, filled with 7<sup>th</sup>, 8<sup>th</sup> & 9<sup>th</sup> unity codes.....

As we move into the next segment of our community call, this spiraling flow of this light pattern will continue, until the last one of you leaves the Sacred Sanctum today.

However, the color will recede, so we will not be distracted.

Remaining in this state of being, continue holding the frequencies at this vibratory rate as you take a couple of deep breaths.....be conscious and aware.

The next segment of today's itinerary will be an open discussion about our new Light Temple vortex.

Before we open the discussion, the Council of 12 is inviting us to begin a new practice in the way we present our comments and questions.

I will relay their explanation as simply as I can.

Continue to hold stably the frequencies of 150% Light as we do this.

This is a new practice that will require practice.

We are being asked to begin communicating from within this new Light Temple Vortex.

This means, when you make a comment or ask a question, you will not talk into your computer or talk to the images on the screen.

Only your microphone will be used. It will be the transmitter of your voice.

Beyond that, once you open your microphone, we are being asked to remove your attention from the computer completely.

Let's together go thru a demonstration.

Take a breath.

Be aware of yourself sitting in your seat in our new Light Temple, surrounded by the members of our collective.

To set some reference points, from the vantage point of your seat, see the 3 seats together where Joan and John sat during the unveiling.

Joan is sitting in the middle seat of the 3, with John on her left and I'm on her right.

Can everyone see that?

Remember there are 4 sections of seating with a narrow aisle between each one.

Again, for our reference points, there are 2 sections to John's left, and 2 sections to my right.

In this demonstration, let's say Sharka, for example, has a comment.

Once she has the floor, she will say: this is Sharka and I am sitting in the first section on Melainah's right.

That will then allow each of us, from our seat, the ability to focus on Sharka. She will then voice her comment or question.

If she has a question for Joan, we then turn our attention to Joan as she answers.

Remember, the goal is to participate in the discussions from within our Sacred Crucible.

Now, while Sharka is making her comment or question, the rest of us will continue holding the collective frequency of the group at 150% Light as we listen.

Let's say DiAna, wants to respond to something Sharka said.

She would then follow the same practice and say: this is DiAna, and I am sitting in the 2<sup>nd</sup> section on John's left.

Take a breath.

Understand this will take practice, and it will stretch us.

The purpose of this is to begin to learn to function in a non-physical environment as we begin loosening the restraints that limit us in physicality.

The remainder of today's session will be conducted from within this Light Temple, as will all future gatherings.

Remember all communication occurs here.

If you find you are falling out it, take a breath,

Re-center, be in the Light Temple and move back into resonance with the group frequency. We will help one another hold these frequencies.

Until we meet again, use the recording of this segment and practice being here. ....

We would love to hear your experiences, questions or observations of this incredible Light Temple over the past 2 weeks.

Let us open our discussion.
