

D: Council of Twelve Teaching

Council of Twelve (through Joan):

We are the Council of Twelve. And we are here to be with you at this time.

Actually, you are part of us, as we are part of you!

And that will become apparent as this time sequence goes on.

We value you what you have brought with you in your bodies, in your consciousness.

And what you are able to do, not only for humanity, but for the Earth.

So, you are a valuable member of this Council.

Now, we would like to talk to you today about this upgrade in the 1st Triad, actually the 1st and 2nd Triad. We are not going to take you through each of the steps that you found in that review with the Blue Star Tetrahedron. But just know that that Star Tetrahedron is so valuable, as is the White Star Tetrahedron.

That Blue Star Tetrahedron holds all of the unlocked Light Templates that were put in play as the dimensions declined, and especially as the last eight declined, for safekeeping, so that they couldn't be discriminated with inappropriately.

And the other thing is that Sanat Kumara saved the Earth from being totally destroyed by allowing.... Well, first of all, by holding that Element of Love that was not going to be available to us very readily in 3rd dimension, because that dimension is all about separation and fear.

So, it stands to reason that these Light Templates have to be sequestered in a very sacred place. And that sacred place that we had no knowledge of, you had no knowledge of in this current life, was in that Blue Star Tetrahedron. And every iteration that you were able to unlock, and the ones that you will unlock in the next few years, are held there.

And the Blue Star Tetrahedron is merged into the White, which is pure Love and Unity. That Star Tetrahedron resides also in your Sacred Heart, because that is who you ARE. That White Star Tetrahedron is in your Merkaba Field to help feed your Light Body.

So, this Blue Star Tetrahedron that we have brought back to your attention is definitely, since you received that, been upgraded tremendously by the state of who you ARE, by the state of your Consciousness, and your state of ability to be the Light Being that you have become at the present moment.

So, today, all we are going to do is upgrade in the Presence of the Blue and the White Star Tetrahedron that 1st Triad.

D: Council of Twelve Teaching

Now, you know the 1st Triad, those first four chakras, relate to you in a physical life. That whole complex, that whole iteration of the 1st Triad, relates to you as a human, also you as a Being of Light growing magnificently in that Light.

So, take a deep breath, and visualize that Triad spinning and spinning in that magnificent Light that is now available to it, to you, and to all Humanity.

Previously, that spin was not near the Light spin that it is today, because you are directing that spin in this magnificent Christed Light. So, as it spins and it spins and it rotates, the frequency of Light is magnified ten-fold from the very first time that you created it in your Field. And that is because of you as a member of this Council of Twelve, what you brought into this time sequence in your physicality, in your Presence.

You commanded the spin to begin. And now you command it to spin at a much more refined frequency, which means in the end that it will be ten-times more effective as you use it. It is the base of the five-Triadic system.

So, now, together as members of the Council of Twelve, members of a vast Brotherhood of Light, command that 1st Triad to spin at 100% Light. The number is irrelevant. It is just the frequency of Light that it is now spinning at.

Deep breath.....

See the magnificent Christed Light emanating in that spinning, spinning Vortex.....

Now, let us go to the 2nd Triad. This is an invaluable creative Triad.

If you will remember, that Triad allows you to compress Undifferentiated Light, creating a Liquid Light or a Light that is very different in its consistency. It's a Nectar; it is like a Nectar of Golden honey, which has a different purpose. And the purpose is to help the cell repair itself.

So, this Triad is an invaluable creative Vortex, that you as a human are capable of using in a whole different way. It has been upgraded on numerous occasions. And the Liquid Light has been used in many applications. The Nectar has been used very proficiently and has affected not only the cellular system, but the neurology of the body and the brain.

At first, when you learned about this Triad, you did not know that this Triad was drawing from the vast reaches of the Upper Seven Chakras, where the Undifferentiated Light resided, the Light, the Creative Light of the All That Is. You did not know that. You took it on faith and just drew in Light. You didn't know from whence it came. It wasn't until later that you learned of what Undifferentiated Light was and how you could inform in a body, could create form in a form. You still haven't achieved that. But we are hoping to rectify that situation.
