

Logistics Note: Next session, #9, will be June 26, 2022, 1pm CDT.

John: Well! Welcome to our 8th Session of Ascending Masters of Light. And, of course, Joan is here, so she can say Hello. This is John. And where's Melainah?

Melainah: Right here

John: And look at her green door – is that cool or what! Thank you!

[Note: John's review of the last session, which was spoken at this point, is written up on page 2 for convenience in using the review separately.]

[3:21] John: Now here's our itinerary for the day:

First, we'll have a centering meditation led by the League of Michael and the League of Gabriel. They will lead us in the process using an upgraded version of the 2nd Triad. This will prepare us for what is to follow.

Melainah will then lead us into our new cosmic, alchemical Crucible of Light, where we will meet with the Council of Twelve.

They will present how the 1st and 2nd Triads are interwoven through specific Energetic Attention Points.

Melainah and Joan will then discuss the dark imprints.

Melainah will present a teaching and process of change in the effect of the dark imprints.

When this is complete, our session will be finished.

We will meet again in two weeks at 1:00 pm, CT, June 26.

[John's Review is on page 2]

[00:21] John Review of last session:

Today's session will build on the Energetics and concepts that we began to put in place in our last session. It is very energetically potent and layered, as are the concepts that will be presented.

The Council has asked me to present a brief review, before we get started, to refresh your memory of the last session.

In our last session, the Council of Twelve took us through the steps to upgrade the 1st and 2nd Triads into a refined Light Frequency.

Then they talked about the value of the Sapphire Blue Star Tetrahedron. This Tetrahedron holds all of the unlocked Iterations of the 5th-6th- and 7th Dimensional Light Templates.

The Sapphire Blue Star Tetrahedron is merged into the Luminous White Star Tetrahedron. This enables us to acquire a state of Consciousness based in the 5th Element of Love and Unity.

The Presence of the four Iterations of the unlocked Time Locks are instrumental in holding our 5th Dimensional Energetic stability. They also provide Equilibrium in the Magnetism of the body, which relate to our emotions. They level out the Electrical charges in the body that relate to our reactive mental response to outside influences.

The Sapphire Blue Star Tetrahedron's content of the unlocked Light Templates will heal that rift in our mental-emotional body.

When these things are put in place, we can then use our mental-emotional body to create form within form coherently in the Consciousness of 5th-6th-and 7th Dimensional state.

The Council talked about the creative value of drawing the Undifferentiated Light from the 4th Triad, compressing it into a Liquid Light or a viscous Golden Nectar Light. This process alters the physical body at a cellular level and enables you to exit the 4th dimension and begin to create a 5th Dimensional physical body.

They told us that we are required to have a stable 5th Dimensional body in order to have a fully functional Light Body.

Whew ! That's a lot, wasn't it!

Anyway, take a deep breath.....
