

Melainah:

Before we begin, just take a moment, all of us,
and just be aware of the Energetics that are set
within this beautiful meeting chamber today.

And, for each of us, particularly those of us in the Gallery,
place your awareness on being in receptive mode
to receive
and to listen from within the chamber to the extent you can
and see the speakers from within the chamber.

So this is a good opportunity for us to become more and more familiar
with receiving from within the chamber.

So, with that, I will turn it over to Lee Ann,
And see you in a little.....

0. Introduction by Lee Ann, Kathleen, Meri-Beth, and Amelia

Lee Ann: First I would like to thank the Council of 12, all the Ascended Masters and beings of light, Joan, and Melainah for all of their guidance and support in researching these two vastly important topics. It was a privilege to be asked to take part in this project and words cannot adequately express my heart felt appreciation. With that said, it is my extreme pleasure to introduce our vastly talented and amazing “Group 1” who will be presenting on the topics What is the Quantum Field and What is Quantum Entanglement and why is it important to what we are doing. Each member has vastly contributed to this project.

Our Co-creators are Meri-Beth Koch, and Amelia Tate and their groups are presenting What is Quantum Entanglement and Kathleen McGarry, and Myself and our groups are presenting What is the Quantum Field.

What is the Quantum Field presentation will go first followed by the What is Quantum Entanglement presentation.

Lee Ann then introduced the people her group.

Kathleen, Meri-Beth, and Amelia then introduced the people in their groups:

1. Randy

This is Randall Westmoreland.

What is the Quantum Field and why is it important?

The Quantum Field is God. It is the Source of all. It is what is before all things, the place that all things merge back into. It's a Field of pure, unmanifested potential: God, Source.

The Quantum Field is space, but space is not empty.

One centimeter cubed has the potential energy of 10^{93} [?] grams – that is a lot of mass. The estimate for the whole mass of all the stars and all the galaxies in the universe is 10^{55} grams, which is 39 orders of magnitude less than the potential energy in one cubic centimeter – not empty!

This is a linchpin to the shift of this Planet and humanity and all Beings on this Planet into the 5th Dimension, I think, because when the Earth and science and humanity understands this, everything changes. We go from a consciousness of lack and struggle to one of unlimited potential, unlimited energy.

So, we need to contemplate emptiness when we contemplate the quantum field, because even our bodies are 99.99% space.

We ARE the Quantum Field. Our atoms are spinning vortexes with a little bit of electrostatic charge. And they're mostly empty space also.

So, we ARE the Quantum Field. We ARE Source. There is no difference.

And when we understand that and we understand that we are nothing more than an Intention in our mind and that of Creator's, our bodies are nothing more than an Intention that holds it together in this illusion of solidity --

When we understand that, we can very quickly manifest and change ourselves and the world.

Thank you.

2. Suzy

What is the Quantum Field?

This Quantum Field is an energetic field of all potentials, all possibilities, and infinite timelines that we can absolutely tap into.

In our Light Conference of 2020, Metatron led us in an experience of the Quantum Field. He told us that this field is a massive, creative Field of Light, Sound, Color, and Geometries that we have not seen, felt, or experienced in this lifetime.

Joe Dispenza has said when we are oneness, there is no separation between Cause and Effect, and our thoughts create experiences. Instead of wanting to heal, Dr. Joe says there is a formula of how to heal, and to create reality. He called it a door to other dimensions. When we tap in, it is so outside of normal that we are running into something profane and we experience it as ecstasy and bliss! The feeling isn't coming from anything out there. It's coming somehow from within. We are accessing the Field, and the Field is creating matter. In the Field our attention is no longer on our bodies, pains, people, places, and things in our environment. We are no longer in the past, or have concerns of the future. We can no longer access our senses. There is a whole other set of rules to execute in.

This is a different consciousness. No longer are we in a state of fear where we create division or separation. This experience of the Divine is a biological upgrade that creates a fullness in our heart that is physiological. Some health conditions will be eliminated because we become more whole. When we create matter to matter there is a long space between cause and effect, between thought and experience. But in this Quantum Field of the Divine we produce an immediate effect, and we are doing it in no time. It happens in the moment.

When we observe the world, we are making decisions, creating attachments, creating expectations, and we are analyzing. What if instead of observing the world first we could think about that state that we are in, be present, meditate on it, and imagine holding this state. Try being with everything rather than trying to figure everything out, or planning on the next step. Just be one with it and from there we can step into that field of infinite possibilities, feel that expanse, and then choose what we want to observe.

This is actually the formula of how to step into this vast Quantum Field. This is how we take full control over our lives. This is how we manifest, and literally how we become the creator of our reality.

2. Suzy, cont'd:

How does the Quantum State apply to what we are doing?

Creating from that place is why we are here. It has everything to do with all of the work we have been doing since the beginning of MA. Our guides have led us here year by year, and step by step.

Why is it Important to What We are Doing?

It is imperative that we access this field in order to step out of the 3rd Dimensional Matrix and connect with Christ consciousness, our celestial and galactic teachers and mentors, the All That Is, and our I Am Presence.

Extra Information Suzy added that was not presented orally during her Presentation:

Ed Mitchell was the sixth man to land on the moon in the Apollo 14 moon landing. What he and his colleges hadn't fully accounted for was the effect of this uninhabited world on the senses. Perceptions of space, scale, distance, size, or depth were horribly distorted. Every sight overwhelmed the eye with brilliant contrasts and shadows.

It was only on the Kittyhawk's way back home that Ed experienced the strangest feeling he would ever have: a feeling of connectedness, as if all the planets and all the people of all time were attached by some invisible web. He could hardly breathe from the majesty of the moment. He felt distanced from his body. There seemed to be a enormous force field here, connecting all people, their intentions and thoughts, and every animate and inanimate form of matter for all time. Everything he did or thought would influence the rest of the cosmos, and every occurrence in the cosmos would have a similar effect on him. Time was just an artificial construct. Everything he'd been taught about the universe and the separateness of people and things felt wrong.

This wasn't something he was simply comprehending in his mind, but an overwhelmingly visceral feeling, as though he were physically extending out of the window to the very furthest reaches of the cosmos. It was as though in a single instant Ed Mitchell had discovered and felt The Force, or Quantum Field.

Nassim Haremein has stated that in this field there is a wave particle duality. At the smallest level of the Universe, everything is either a wave or a particle, vibrational or solid. There is no structure to a wave. Everything is everywhere. Particles are the solid, or material part of the Universe, which is of course what we are, and the reality that we have created.

Everything that is a solid is also a wave. It depends on if we are observing it or not. There is no structure to a wave. Everything is everywhere.

2. Suzy, cont'd:

Quantum scientists have discovered that simply by observing something, a wave turns into a particle, or solid state. When that material item is not being observed, it turns back into a wave.

Everything that is solid is vibrational, so everything that is a particle is also a wave. Quantum scientists have stated that simply by observing something, a wave turns into a particle, or solid states. When that material item is not being observed, it turns back into a wave. Non observation creates a wave state in which there are infinite timelines, infinite potentials, and infinite possibilities. When you add observation, you are choosing a timeline, and therefore creating with your choice, whether you are doing this intentionally or not.

Jim Self and St. Germain, channeled through Geoffrey Hoppe had a discussion on Crimson Circle's Cosmic Conversations.

St. Germain stated that we have learned to think that we are moving through time and space. We have been manipulated to believe that we are powerless and need go outside of ourselves to create. That everything else external has it, and we need to go out and get it.

When we are conscious and aware in the present moment... All of TimeSpace, Light, energy, potentials and opportunity comes to us. We are not chasing it. If we are in the present moment and aware, then we literally get to choose any of those energies, those forces. Everything comes to us. Then we can simply imagine what we want... like holding out our hand and thinking apple, and the apple appears. We simply let that time space come through us. It will actually assemble the energies and create that apple right in our hand. From a state of consciousness we create it, manufacture it, build it, from consciousness! This sets up an opportunity to be chosen from, or not.

3. Margaret

Hello, this is Margaret

When I saw these questions, I pondered a lot and when I ponder, sound comes to me. And so I hummm.

Sound and Light and Colors are all part of the Quantum Field. And I feel it is a flowing and vibrant Consciousness. A stream of Consciousness that gives us the Energetics of Possibilities, of Potentials of Creation. This is SOURCE Energy where we draw from for our creations.

KRYON has said that our Merkaba is a Quantum Field and so I applied this information and found that using our Merkaba field allows us to communicate the potentials and possibilities simultaneously between our Toroidal Fields. (which you see on the screen)
All these fields connect us with others in a Quantum Field of creation. A field that is All That Is !!

And my ponderings about all this make me hmmm, hmmm, hmmm.
I thank you

4. Kazuko

Our groups have been formed and the Council of 12 has given us the privilege of researching two topics. One is "What is the Quantum Field?" and the second is "What is Quantum Entanglement". How does it apply and why is it important to what we are doing? How is it part of our Prime Directive?

What is the Quantum Field? How does it apply to and why is it important to what we are doing?

AML Group 1 presentation #4 Kazuko Cooper

Hi this is Kazuko.

To me, the Quantum Field is a field of infinite possibilities. It's the field where miracles and mystical experiences occur. It's the field with which we consciously interact when we pray. And, of course we are immersed in the Quantum Field with our Teachers of Light and all the Grand Beings of Light when we are in our Crucible in our Light Body! We are so fortunate that we are now very capable of consciously accessing this field by intending to be in the 5th and higher dimensional state of consciousness.

I feel that when we find ourselves in Bliss and Joy, or in Awe, whatever it is that we are experiencing in that moment, we are in it, we are immersed in the awareness of being in the Quantum Field that is an experience of timelessness and of being at One with the flow of Life itself.

I'd like to share one such experience I had recently.

There's an elementary school right across the street from my house and it was pick up time, around 3:00 o'clock in the afternoon. I happened to be looking out the window and observing children and parents walking from school. I noticed a little girl and her mother briskly crossing the road toward their car which was parked a few feet away from me. As she got to the car, she saw me in the window, pulled her mask down in a flash and gave me a huge sparkly smile before disappearing into the car. That, to me, was Quantum! In that moment of time and space in suspension we shared an incredible sense of togetherness - a glimpse, at least, for me, of the threshold to the Quantum Field.

4. Kazuko, cont'd

Quantum Science tells us that space is permeated with plasma.

What is plasma? — here's what Andrew Collins says. "Take a gas and fracture it through heat, it breaks up the atoms of the gas, and then the **electrons break free**, and when that happens they start getting excited and **they emit photons**, and when this happens, more and more electrons break free of the atoms, bump into each other, create almost like a chain reaction, and as this occurs, **they produce their own magnetic fields** - they are getting bigger and bigger — these seas of electrons, until eventually you can actually see plasma as like a ball of light."

Nassim Haramein says, "Plasma has all kinds of self-organizing behaviors. It suggests that there is a information flow that's going through the system so that the system will tend to create certain organizing principles. Scientists are discovering that **vortices in the plasma can organize to make very specific crystalline geometry** so that plasma can self-organize and can create very specific dynamics."

This is exciting to hear. That's how matter arises from the nonphysical, isn't it?

I believe that our etheric and physical body is made up of this plasmic photonic Light. And, when we consciously intend in our Higher Mind to transform our dense carbon based cells to the 5th dimensional crystalline structure, we are participating in the specific alchemical process of transformation of our body in the Quantum Field.

A very basic level of understanding of the Quantum Field helps me, as a non physicist, to see how we are transforming our consciousness and body to a higher dimensional state.

Within our cohesive collective, we participate individually in the conscious process of transformation of our body into the 5th dimensional state. In doing so, we are achieving more and more of the desired outcome which is reflected in the Quantum Resonance Field and thus in all people as they choose to transform their bodies into the 5th dimensional state of beingness.

Thank you.

5. Sandee

The Quantum Field presented by Sandee Endahl

The Quantum Field is a vast energetic field of Consciousness that encompasses the Element of Love – that unlimited Creative Force held within the Creative Mind of Source.¹ Simultaneously it emanates as the minutest particle and radiates as a wave. It is local and non-local, physical and non-physical at the same time. In its non-local non-physical aspect, it functions as the realm or force of creation where manifestation originates. In its local physical aspect, it is that moment where manifestation presents as creation in matter.

Consciousness in the Quantum Field “governs over everything, over the whole nature, but, additionally, this is also consciousness of the observer, the human, the subject in the experiment. Consciousness is the key factor in the phenomena of nature.”² Un-manifested and manifested are nothing but two states of the same phenomenon.”³ It is the presence of the observer, the human essence that affects the outcome. “The Quantum Field may manifest itself in the form of a wave or a particle, as energy or matter, depending not only on the interpretation of the observer, but their presence and intention.”⁴ “Conscious intention determines the result.”⁵

Much like what we studied in MA, the Neutral Observer⁶ has an effect on the outcome just by Being in All That We Are. As the observer, our Consciousness allows the un-manifested and manifested from undifferentiated Source to come into fruition. We as observers in the creative process allow the expansion of Consciousness and frequency to have the presence in our 5D Lightbody to transform our etheric body into the KA body to travel in our Merkaba through the Quantum Field of the Creative Mind of Source. In this energetic field elevating our frequencies in 5th 6th 7th dimensions and into the 8th and 9th dimensions becomes a reality.⁷ There is no time space in the Quantum Field, so Consciousness in our higher Spiritual KA body is natural.

Increasing our Merkaba to 130% Light and 150% Light allows ease in traveling inter-dimensionally in the Quantum Field where we are manifesting and upgrading our 5D crystalline physical body as we continue to activate our Lightbody – KA body for ascension and beyond.⁸ Visiting parallel lifetimes inter-dimensionally has become conscious now.⁹ Our Harmonic signature, our Prime Directive¹⁰ continues to be revealed in the awarenesses presenting in the Quantum Field.

We are the unlimited Creative Force within the Creative Mind of Source. It is our Being in the All That Is that experiences the Consciousness in the Quantum Field. Observing and knowing this state of Being manifests in our higher Spiritual Consciousness facilitating our ability to transform our physical body to travel in the Quantum Field for ascension with intention.

6. Don

Don Reid Presentation

Good Morning, this is Don speaking,

The Quantum Field is an invisible field of energy and information a field of intelligence or consciousness, that exists beyond space and time. Nothing physical or material exists there, it is beyond what we can perceive with our senses. Quantum fields are present everywhere all the time, the universe is nothing but quantum fields, a field for each particle, one for protons, one for electrons, and so on. For these fields to manifest they need energy from another field. Fields of information and energies that govern all laws of nature. It is important because with practice we can access a field through meditation, quiet your mind to a still state of calm, match a frequency with a thought of a reality you want that is the reality you will connect with.

The application of these fields is endless. All things are possible.

Thank you, Blessings

7. Vallie

Greetings! I AM Vallie Marie.

When we first began to discuss our views of the Quantum Field in our respective groups, I had just recently viewed the movie/documentary "The Quantum Universe." Two concepts got my attention immediately: the enormity of Space, and Plasma. When I asked [mySelf] the question "What is the Quantum Field?", I centered into my Sacred Heart and within seconds received the answer [Knowing]: The *ALL THAT IS*. God Consciousness; or Christ Consciousness; the Creative Source Energy from where our everything comes.

I've read chapters in books and watched many videos on all things Quantum. There are whole fields of mathematics, geometry, physics, electricity, that explain how we do things and in many cases their findings overlap. But after decades, most scientists are coming to the conclusion ~ some kicking and screaming [little dry humor here] ~ that "... a universal collective-like consciousness of some sort may be physically inevitable!"

One Fun Fact I learned was Heisenberg's "Uncertainty Principle" It is a Fundamental Property of the Universe that: you may have

1) A Definite Position with Very Uncertain Momentum

~OR~

2) A Definite Momentum with Very Uncertain Position

~OR~

3) some Intermediate State with Uncertain Position and Uncertain Momentum.

"In other words, you can only know certain things precisely ~ but not everything!"

I've thought and thought about why this research is important to what we are doing in our group [AML] work. I can only conclude at this time that it is to expand our consciousness, open us up to new ideas [of looking at things], new possibilities, and seeing the world through the eyes of another.

I know it [is] for me.

This morning in meditation, I actually felt *ALL THAT IS* in all the Space within this physical body.

Thank you.

8. Cindy

WHAT IS THE QUANTUM FIELD

I've always believed that Spirit and Science need to merge again, in order to create an energy to assist in Humanity's advancement. Now there is starting to be scientific proof, and people are feeling and knowing a massive change is coming.

In the early 1900s Neils Bohr, a physicist changed physics. There would be a Quantum World and Quantum Mechanics. This separates math from the Universe and creates the split between science and spirit. It created a Quantum track and a Cosmological track.

Nassim Hamein, a self-taught physicist has written a mathematical equation that is in the process of proving Spirit and Science are one. He uses the smallest measurement in the universe, the Planck unit. And the proton of the atom.

Independent sources are using His equation and discovering its accuracy within one standard deviation.

IN THE QUANTUM FIELD

- There is hidden mathematics still being discovered
- It is only 4.9% matter
- We are in the QF and we are 99.99999% space
- Space creates matter, not the other way around
- Space is a great organizer
- Universe is continually providing feedback loop of information. This creates what we know as awareness, consciousness.

8. Cindy, cont'd

So what is this Quantum field, this space, this universe..

it is dynamic pure energy constantly in motion.

It is all that is.

It is every opportunity,

It is self-awareness and consciousness.

It is pure Prime Creator Love (do we know what this is. This Love is huge, bigger than we can even imagine.)

It's power created the Oceans, the Galaxies, flowers, black holes, etc

It is consciousness

You have all of that in 99.99999% of what you consider YOU. The Quantum Field is in the tip of your finger, and the tip of the tip, and the tip of the tip of the tip, to infinity.

Everything you need to create is already swirling within you and outside of you.

Every behavior, emotion, and thought you have impacts the Quantum Field

To paraphrase Nassim Hamein: What Imprint do you want to leave?

In conclusion, here is a quote from Rumi:

“Stop being so small, you are the Universe in ecstatic motion”

9. Anne-Marie

What is the Quantum Field?

Some of my information comes from Gregg Braden's book: "The Divine Matrix": Bridging time, space, miracles and beliefs.

He mentions four discoveries.

1. There is a field of energy that connects all of creation.
2. This field plays the role of a container, a bridge and a mirror for all beliefs within us.
3. The field is nonlocal and holographic. Every part of it is connected to every other and each piece mirrors the whole on a smaller scale.
- 4, We communicate with the field through the language of emotion.

Discovering the Divine Matrix: The mystery that connects all things.

Gregg also makes reference to Max Planch's 1944 statement:

There is a place where all things begin, the place of pure energy that simply 'IS'. In this quantum incubator for reality, everything is possible.

In M.A. we used the Rays of creation to connect to the 6th Ray of all possibilities. To me this 6th Ray is the quantum field where we create using our intention and attention and the rays of creation.

I also believe that alternative healing methods such as Reiki, quantum Touch, the reconnection etc. practitioners tap into the quantum field to align the body for possible healing.

During meditations as well as in our sleep-dream space we are also connected to this living Source field where we receive communications via color codes, geometries, images and various messages.

On the walls of Egyptian temples, pictographs and hieroglyphs indicate a connection to the stars. In A.M. of Light we connect to various stargates.

9. Anne-Marie, cont'd

In her book "The Field" The Quest for the secret force of the Universe, Lynne Mc Taggart makes references to many researchers: scientifics and physicists who discovered alternate healing. One example is "Homeopathy" where

- mysteries of water were proven and eventually accepted.
- how water imprints and carries information
- how two gases create water.

At normal temperature and pressure, atoms and molecules are packed closely together and exhibit: a coherent domain.

Dr John Ryan of Ottawa channels: "The Sirian Blue Light Collective" who identify themselves as the force of "Light Being" who work in support of QUANTUM DNA.

In his meditations Dr Ryan describes the visuals he is receiving. During one of those moments, he refers to Lee Carrol who channels the consciousness of "Kryon" announced that humans have 24 chromosomes.

In his work Dr Ryan refers to this 24th chromosome as a quantum chromosome. It is not in the physical. Its activation is a 'Gift of Grace'

Thank you

Blessings.

Anne-Marie

10. Natalia

Natalia Rumyantseva. Presentation on March 19, 2023.

I have read books by Gregg Braden and Joe Dispenza about Quantum Field. They describe the latest scientific discoveries and their connection to ancient wisdom.

One day, recently, it was a sunny morning. I was driving along an empty country road and was thinking about Quantum Field. Suddenly I felt that I was very vast, airy, spacy, and so big, as to the sky. I was completely dissolved in the Quantum Field. And I was very calm and quiet. And I loved All That Is. I was Calmness and Love themselves.

And I decided to play with it. I told myself that I loved all but one person. And I immediately stopped to feel calmness. From that moment I felt many different feelings, but not calmness. I felt worries, disappointment, disturbance, eagerness. But no calmness.

Then I told myself that I love All That Is, and started to feel calmness again.

It was a lesson for me. To be calm and quiet I need to love unconditionally without any exception.

11. Lee Ann

Lee Ann Reid

What is the Quantum Field?

Quantum physicists call "conscious and intelligent mind" the **Quantum Field**. However, for eons it is known by many names Buddhism calls it "our true nature". Daoism calls it "The Dao". Western religions call it "God" and more recently referred to as the **quantum mind**, the unified field, The All that is, God, **universal consciousness**, whatever you want to call it — it's no longer just a philosophical, Woo hoo out there idea and an unproven theory on the fringe of metaphysics **Science has proven what we, on a deeper level have always known that it is the unlimited potential that lies within each of us.**

Our consciousness is connected to the Quantum Field, and all physical matter in the universe arises from this non-physical Quantum Field. The Quantum Field is in all space and all time it is unlimited.

This unlimited field, does lie not out there it lies within you in each of your cells in your entire being. This is the "new" platform we will begin to consciously work from and is required as we integrate with the higher dimensions. It is a whole new way of thinking we are not defined by matter, rather by the space within the matter which is electromatic. Remember our foundational tools is that thoughts are electric and emotions are magnetic so when the brain creates the thought and the heart attaches an emotion, we create an electromagnetic field which resides in the space within our cells. There is no such thing as an empty space. In creating the electromagnetic wave, we have given space a value.

Therefore, The Law of Attraction holds true that if we change our electromagnetic field (by changing our thoughts and emotions), then that will attract a new reality from the Quantum Field. The thought must match the feeling, and then we have to hold that state of being long enough for the manifestation to occur.

We are not a drop in the ocean, We ARE the ocean in a single drop.

12. Kathleen McGarry

The Quantum Field in the Body

One of the most reassuring things I didn't realize until I did the research for this project was that the Quantum Field is everywhere not just "out there." It exists everywhere and any time there is an energy exchange like the quartz chips in our phones receiving signals or the electricity it takes to make toast. And for us, as humans, it is the energy of Chi that flows through us through the tiniest dna strands within our cells to the organs via meridians and axiatonal spin points through our meridians and chakra systems. We are part of the celestial flow of the Universe and the light we carry from our soul/spirit and Ashashic records are all part of the multidimensional field.

According to Lisa Renee in her book, the Ascension Glossary, she describes how the human body is connected to the Quantum Field:

"Axiatonal Lines create the energy network in the light body where all dimensional frequencies are transduced into the meridians, chakras and etheric nadial structure. These 12 vertical lines move throughout the entire light body running energy to the chakras. These 12 vertical lines create intersection points with the horizontal fields that project out the Chakra cones, and where the DNA manifests. Each axiatonal line has a corresponding dimension, Chakra, chakra crystal, and frequency color."

12. Kathleen McGarry, cont'd

Further, Karen Curry Parker states in her book, The Quantum Human:

“I want to invite you to suspend any previous scientific knowledge that you have about evolution, most of which you learned in high school biology class and is based on Darwinian theory, that has, at best, a lot of holes in it.

The assumption that I'd like you to make is that the experience of our current reality is the manifestation of the evolution of consciousness-not our physical form. Evolution of our physical form is a manifestation of an evolution of our consciousness first.”

In essence, she is saying, the body follows the consciousness, as we have been taught in AML.

I see the body as a grid of light. We are meant to radiate and glow, at any age. Meditation, Meridian therapy, touch therapy and acupuncture are a few ways to help to restore the body/mind/spirit to a state of balance and radiant health. We are meant, by design and through our on-going evolution of our consciousness to be connected, to ourselves, to each other and to the Universe through the power and Creative Force of the All That Is.

13. Charlotte

QUANTUM FIELD

Charlotte Soto

I am going to give you my perspective from top down - Source and bottom up - Earth

What is the Quantum Field?

The Quantum Field is Source Creative Energy

LOVE & LIGHT

Love is a state of Consciousness

The 5th Element

The Element of Love will be called the Massive Creative Consciousness of Source by Master Kuthumi
AML L-1 S#15 P-C

I call it The Energy of Love

LIGHT

From Light you can make the Elements Like Oxygen - Hydrogen - Carbon

All the Elements on the chart of Elements

From that, things like- Water. Then Planets and Bodies are created

From 12/D Source GOD Love & Light

We create our bodies from the Quantum Field

The body I now have is a presentation of Source

You are what you choose

Bottom up from Earth

In 3D to become Awake & Aware

That is why we were given Light Packets. To help raise our energy. So we could activate DNA

As we increase our Energy. All of which we pull from the Quantum Field. To make our creations.

Each step from 2 strands DNA to now 10 strands of DNA. Gives Us skills and creative opportunities

They have guided us. Given Us Light packets to enable Us to activate DNA

It has been like learning to ride a bike with training wheels.

The training wheels are coming off !!

Time to Ride IN ALL THAT I AM

13. Charlotte, cont'd

What is Quantum Entanglement ?

The Quantum Field is both wave and particles.

The Quantum Field changes from Wave to Particles by the thoughts held by the Observer

At starts the Entanglement . Everyone and Everything comes from the Quantum Field.

That is why we are All Entangled. All part of the One

Every thought and every change you make goes out to Everyone

How does it apply to what we are doing ?

This is application

We are bring the Original Christed Blue Print in to Our Consciousness to board cast that to others.

So they will then connect to theirs

Why is it important to what we are doing ?

As the Christ Consciousness awakens and is held by us and then in others.

The Planet and Humanity will move to 5th Dimension and Beyond

How is it part of Our Prime Directive ?

As I came here to work with the Planet and Humanity to create a 12th dimensional Planet.

As I hold my I AM Energy and Consciousness I pass it to others through the Entanglement.

So, I have to ask My self

What am I choosing as a Soul ?

What did I come here to do ?

Then Be About Doing It

Concept - Awareness- -Application - Outcome

SO LIVE LONG & PROSPER

14. Amelia

What is Quantum Entanglement?

Amelia Tate

Let's begin with a simple description of quantum entanglement.

"Quantum Entanglement is one of the uber-bizarre phenomena seen when things get itty bitty, or inside the quantum realm. When two or more particles linked up in a certain way, no matter how far apart they are in space, their states remain linked. And that means that they share a common unified quantum state. So, observations of one of the particles can automatically provide information about the other entangled particles, regardless of the distance between them. And any action to one of these particles will invariably impact the others in the entangled system." *Paul Sutter, Research Professor in Astrophysics*

So, let's "imagine that the particles are electrons which have a quantum property called spin. And that makes an act like little magnets." *Arvin Ash*

"Quantum superposition is the idea that particles exist in multiple states at once. When measured, it is as if the particle selects one of the states in the superposition." *Andreas Muller, Associate Professor of Physics*

So, for example, an electron exists as both spin up and spin down until it is measured on a chosen axis.

"The strange part of quantum entanglement is that when you measure something about one particle in an entangled pair, you immediately know something about the other particle, even if they are millions of light years apart." *Andreas Muller, Associate Professor of Physics*

14. Amelia, cont'd

“The spin of each particle is both part up and part down until it is measured. Only when the measurement occurs, does the quantum state of the spin *collapse* into either up or down – instantaneously collapsing the other particle into the opposite spin.” *Andreas Muller, Associate Professor of Physics*

So, the spin of the entangled pair is always correlated, no matter how far apart they are, are what lies between them.

This brings us to the concept of nonlocality.

“Once objects are entangled, they're not separate. They are in a sense two parts of a single object. If you do something to another particle, such as measure it, you alter the other particle, too. Things at one place don't depend just on what happens in the [local] neighborhood of that place, as they do in the classical [Newtonian] world. There seems to be this instantaneous connection between different regions and particles, regardless of how far apart they are. What it really says is that we can't think of those two places as being distinct, [no more than we can think of those two particles as being distinct], quantum mechanics collapses them into a single thing. In this sense, quantum mechanics seems to make nonsense of our normal sense of space. In fact, some researchers suspect that quantum entanglement is more fundamental than space itself, and that our notion of space actually emerges from the quantum entanglements that connect objects in a vast web of interaction.” *Arvin Ash*

And physicists are now theorizing that entanglement, space time and wormholes are actually linked. And they've actually calculated that space without entanglement couldn't hold itself together. [And metaphorically] that quantum entanglement is the needle that stitches together the cosmic space-time tapestry.” *Andrew Grant, Science Writer and Editor*

14. Amelia, cont'd

Conceived by Einstein as a *bridge*, a wormhole, connects two distant points in space-time, through a “tunnel” that is shorter than the distance between the points and it serves as a kind of shortcut through space time.

The Keys of Enoch says that a wormhole is a “singularity, where the matter-energy construct is warped to yield another space-time continuum.”

So now physicists are theorizing that “perhaps the reason that quantum entanglement occurs and exhibits the bizarre properties that we observe is because, at a deeper level of reality than we can perceive, entangled systems of particles are actually connected by an unseen wormhole.” *Ethan Siegel, Astrophysicist and Science Writer*

And according to Nassim Hamein, all the wormholes that connect these entangled particles would be like a spiderweb information network emanating and connecting all of the black holes, all of the singularity, all of the particles in the Universe.

At a very fundamental level of creation, everything is connected through this incredible network that is circulating through our Universe.

When information is exchanged through the network, no matter at what scale, the energy that it produces is what we call mass. And that is what we call our reality.

Namaste.

15. Mark

[Please follow along on the powerpoint slide presentation Mark gave in his presentation, starting at 53 minutes into the group presentation, recording d]

Slide 1: Quantum Entanglement

Slide 2: I want to talk for a moment about the larger picture.

Slide 3: When I was undergoing some of my technical training way back in the dark ages, there was this double split experiment that I was exposed to.

That was when I first learned that there were two aspects to the subatomic particles: they were both particles and waves.

Slide 4: And then it became apparent somewhere along the way that they were the Planck particles. These were discovered as the smallest units in the universe.

Slide 5: Trillions of planck units cluster together to create sub-atomic particles like the photons. Let's look upon those as Light.

Slide 6: These sub-atomic particles create atoms that are the basis for all in the physical universe.

Slide 7: Building blocks of the universe.

So planck particles can go and create atoms and molecules.

They are also capable of being part of the creation of galaxies and also black holes.

Slide 8: Something glues the planck particles together into the nucleus of an atom.

Slide 9: This same "glue" is used to create molecules, larger physical structures, planets, and galaxies.

Slide 10: This glue is called Love

Slide 11: To me this provides a whole new dimension to the word Love

Slide 12: It has given new meaning to the words Love and Light.

It has completely changed my understanding of the universe.

Slide 13: Now for Quantum Entanglement

Slide 14: Quantum Entanglement is what happens when two quantum particles interact. They become interdependent.

Slide 15: Once two particles become entangled, it's as if they become a single object – a singular quantum entirety, a quantum nonlocality

Slide 16: Picture of spin direction

A unique facet of the quantum entanglement is that if one particle is spinning up, the other entangled particle will spin down. This is true of other characteristics.

15. Mark, cont'd

Slide 17: Everything in the universe organizes itself around tiny black holes – from galaxy size to sub-atomic.

This results in a holographic solution where every point contains the whole

Slide 18: Picture of waves

I find it easier to visualize two entangled particles as waves that are somehow separated by distance.

Slide 19: Whether entangled particles are separated by micro-inches or light years, changing one particle makes a change in the other.

This doesn't violate the classical speed of light rule, because there is no 'movement' through space.

Slide 20: Diagram

This is an experiment where a light beam is thrown at a carbon particle.

You can see it that it glows and it throws off particles, sub-atomic particles that go through a polarizer and a detector up top.

What's interesting, of course, is that the detector on the bottom changes, which is the quantum entanglement.

Slide 21: Nothing is independent from anything else in the universe.

Everything is connected through quantum networks of entanglement.

Anything I do influences everything else in the universe – every action produces a reaction.

Slide 22: The universe is entangled via planck units and the glue of Love.

True at the quantum level as well as at larger physical levels.

Slide 23: Quantum Entanglement

We are connected in many, many, many ways to many, many other beings and things in a universe of light and Love.

Slide 24: At the planetary level, the atomic level, and/or the quantum level, I am **entangled** with almost everyone and everything else in the universe.

Slide 25: I now have a whole new way of seeing the universe in terms of **Light, Love and Entanglement**.

Slide 26: I am most grateful for this. Thank you very much.

16. Meri-Beth

Hi, this is Meri-Beth

What would change if from the moment you were born up until now, you were taught that in some way we are all truly connected? What if a story of interconnectedness was the foundation of your worldview. What if instead we saw each other as fragments of ourselves and truly acknowledged that deep within our being.

From a scientific standpoint you can think of this inter-connection through quantum entanglement.

Quantum entanglement occurs when two particles, in their quantum state, are separated from each other yet, when you do something to one of them the other does the exact same thing regardless of the distance between them.

In 1965, alpha brain rhythms were elicited in one pair of identical twins as a result of evoking these rhythms in a conventional manner solely in the other. How is this possible? How do participants in US government remote viewing programs view people, places and objects hundreds of miles away with nothing but their minds?

Interconnection is a central core of many First Nations worldviews and ways of knowing. This mindset reinforces that everyone and everything has purpose, is worthy of respect and caring, and has a place in life. Within First Nations they embrace the idea of interconnectedness via a term called "All My Relations." This connects them to their families, communities, ancestors and future descendants, the land, and all plant and animal life. These cultures exhibit a scientific understanding of the earth, weather, cycles of the seasons, medicinal and food sources, and creating everything they need from nature's abundance.

This worldview is not a new idea, but one we may more collectively return to. This realization suggests we must take an active and engaged part in creating a better world.

New systems and ways of being are held within each of us, and not just within the external systems we create. If we can not hold new worlds within ourselves, how can we expect them to be created.

Thank you-Blessings

Meri-Beth

17. Helen

Hello, this is Helen.

Being a painter, I feel more comfortable contributing with a picture instead of some kind of mini-lecture in this presentation. I've been thinking about what the physicist Lothar Schaefer had to say, after having watched his video 'Quantum Reality and the Spiritual Mind'. Here is invisible potentiality, like waves, forms, entities, patterns of information. A realm of potentiality. First there are waves, which we cannot see. From there the particles become visible, matter becomes visible.

I have this painting hanging on my wall. And looking at it after having listened to Schaefer, it struck me that maybe one can in some way could experience this phenomenon here. However, as being a painting, it is definitely matter and visible. It may be too far-fetched, but I'm taking the chance.

Thank you.

18. Sarojni

Nassim Hamein **Quantum Entanglement**

Entanglement in the Holographic Universes from Gaia S1 Ep 5

Nassim Hamein explained how the holographic universe theory shows how the whole universe is entangled. Science is now catching up to what ancient cultures knew about the universe.

Particles in different states can be entangled, it does not matter how far apart they are placed. If one aspect of one is changed the other one changes.

All the particles that came out from one point is entangled, so the early universe is entangled. Therefore, we have been entanglement since "The Big Bang".

All the information is stored in the universe so the information from the ancient masters can be accessed because each point (individuals) influences the whole, e.g., in meditation, when people get together the larger group can make a stronger shift in consciousness than an individual or a small group. It also depends on the strength of the intention.....

Quantum Entanglement is also part of the New Science.

I will refer to the Power of 8 healing groups that are created by Lynne McTaggart in order to address oneness and Quantum Entanglement. Lynne is a trailblazer and is referred to as the Madonna of the Quantum World.

For many years, she has conducted Intention Experiments which has shown that collective thoughts, can change properties of plants, make seeds grow faster, purify water, heal serious health conditions to name a few.

The most powerful effect of group intention, which participants experience as a profound state of oneness or Quantum Entanglement is that it reflects back on the participants themselves.

18. Sarojni, cont'd

Power of 8 groups

The groups usually each have 7 participants and one 🙌 recipient who has a health challenge. All 7 participants send love ❤️ ✨💖💖💖💖💖💖 to the recipient. The session lasts for about 10 minutes.

After being a recipient in a power of 8 intention group, a woman shared her experience.

She had a paralysis that would come and go but mostly come. During the Power of 8 intention group, she felt the most love that she had ever felt in her life. She said that it was too much for her and sent it to a relative who also had a serious medical condition. As she did this, she felt the wheels on the wheel chair going through the floor and they were both healed. The moment when she became altruistic the change occurred. The woman on the wheelchair was able to walk, which continued way after the conference.

The Power of 8 group demonstrates all the participants were feeling a state of oneness or in Quantum Entanglement.

18. Sarojni, cont'd

Let's take a few minutes to have a short experience.

We have all participated in experiences of sending energy or long-distance healing at some point.

As a Prime Directive of honoring Ghia, we are going to participate in a short version of the power of 8 group with our entire collective.

Of course, you have free will to participate or not.

I invite you to make yourselves comfortable.

We, will take 2 Quantum Breaths That is, inhale through your nose ...Exhale as though you are breathing out of a straw.
So let's begin. Now, take another Quantum breath

Now visualize the earth in the centre of the circle with us surrounding her, holding hands if you choose.

Now, using our intention we will be sending love and gratitude to Ghia.

Now, bring down the intention of sending love and gratitude to Ghia to your heart

Now, visualize Ghia receiving our love and gratitude for 1 minute (I will ring a bell to indicate when the time is complete)

Take another Quantum Breath
Thank you, Blessings

19. Kazuko: Closing Meditation

Guided Meditation AML Project Group 1 March 19, 2023 by Kazuko

A meditation — **Feeling the Quantum Field in the Body**

So let's take a nice deep breath....

Once again let us be aware of our Light Body... feel the Crystal River flowing through us...

Be in our Sacred Heart....

Be an **eternal Light creator** which we are...

Let us be in heartfelt gratitude and appreciation of the enlightening learning opportunity we received. Let us be in Unity of the sacred Oneness...with everyone of us and all the Luminous Beings of Light who are present and supporting us in our Cosmic Crystalline Temple of Light.... immersed in the Quantum Field...

In this Field of Magnificent Light, as the radiant Christed Beings that we are, let us remember, we are pure Spirits created in Source Light...our original State of Being

See and feel the Flower of Life ... the original Sacred Geometry of Life....

In our Luminescence, let us be aware of the Beauty of our physical vehicle.....the magnificent creation that is the sacred temple of our Soul... allowing us to experience so intimately the Beauty of the physical realm that is made out of matter which is constantly arising from the Quantum Field in Divine Organization and Coherence....

This Field is also within us ... within the cells of our bodies... within our multidimensional DNA...

Feel into it.....

19. Kazuko: Closing Meditation, cont'd

Let us travel now in the Light to the cells of our bodies.....see the molecules in the cells....atoms and subatomic particles spinning and spinning at incredible speed...generating a powerful electromagnetic field of Light...

With our intention placed in our Higher Mind and SoulSpirit and utilizing our 2nd Triad which is spinning and spinning in the luminous emanation of the multidimensional Diamond Configuration encompassing our entire head area, let us now actively and consciously participate in the Quantum Field to transform our 3rd/4th dimensional carbon-based cells into the 5th dimensional state of crystalline structure...

See the electrons dancing about ...spinning faster and faster... in a higher charge...igniting and creating a brilliant liquid plasmic Light!

See the plasmic Light filaments weaving in and out of the luminous field of Living Light, bathing the cells of our etheric body with biological Crystalline Plasmic Light!

Watch the etheric cells alchemically transforming into the 5th dimensional crystalline structure of physicality!

Let us see and feel our entire physical body illuminating in the beautiful bright Light!

See the activated multidimensional DNA strands in our cells radiating in the swirling Light!

See our 8th Dimensional Luminous Field of Light shimmering at the edge of our unified field!!!

And this concludes Group 1's presentation. Thank you.
