

[Audio A at 18:48] Melainah: Alright... So let's move on to our discussion and questions and answers about Group 1 and Group 2's Presentations.

First off – both groups did such a magnificent job!

I mean, I was thrilled and pleased with every single moment of each of those Presentations. You each were masterful. You brought forth what needed to be brought forth. I think we all have a so much better understanding of these topics.

We'll start with Questions or Comments for Group 1.

So, if you have any questions about what Group 1 presented, which was What is the Quantum Field and What is Quantum Entanglement, please address that to Group 1. And anybody from Group 1, if there is anything more that you would like to add from your perspective of having gone through that Presentation, and your perspective from that, we'd love to hear from you also.

Moving to Group 2, their topic was What is Quantum Singularity and What are Fractals?

[Note from transcriber: We don't usually transcribe the group discussions, but here is a brief summary of the main points and transcription of a couple comments. Of course, Audios B and C of the two group discussions are available with the whole conversation.]

[In Audios B & C] Many group members expressed their appreciation

- for the presentations
- for the beautiful art work and graphics
- for the personal experiences people shared
- for Kazuko's closing meditation
- for how much better they understood these concepts now, ranging so broadly, covering physical, mental-emotional, and spiritual concepts
- for the fact so many different individuals gave their own unique viewpoints [from their individual Streams of Consciousness]
and how the flow from one person to the next was so smoothly orchestrated
- for having been part of the Groups
- for their Group leaders
- and the leaders expressed appreciation for their group members
- for now feeling more connected to others in our Ascending Masters Collective
- for recognizing their entanglement and connection-Unity with everything
- for feeling the Unity and Wholeness of our Group
- for being able to actually *feel* these Quantum Energies, not just talk about them
- for seeing the existence of the Quantum & fractals in every part of life, including sound, with some specific examples from Africa and the world of art

There was discussion about how to incorporate the new Quantum understandings into everyday life

There was a question about how to maintain a spiritual space while working with these concepts on the mental level.

Suggestions on how to do this:

Keep your attention on your Sacred Heart; think from the Heart

The mental level is only a bridge that leads to Knowingness

Feel what you are studying and presenting

Focus on graphics, especially fractal graphics

[Audio C @ 11:30] DiAna expressed her experience so elegantly in words that projected the Energy and Beauty of the Quantum Field:

“One of the things that I’ve noticed as this process has started is that at any given moment, the Quantum Field Entanglement, Singularity, and Fractals come together in a moment that is felt. And from that, I am able to move forward in my daily activities in a different flow. There is no way that I am going to be able to focus in on the Quantum Field. But, if I’m able to bring in a Stream of Consciousness, a Stream of Energy that allows me to express myself with other people to feel that entanglement. And then from that, take a breath and send out in Fractal Energies from sound that is not heard, from colors that are not seen, from designs that may not be present in the visual eye of your brain but is Known. And you leave that in the space that you occupied for that moment..... Then you are bringing all of that technical information and the spiritual aspects of it into one cohesive, Divine moments [with an s]. And the more that you become aware of those moments, the more we are bringing everything of all that we have been learning and will continue to learn into the 3rd dimension.

And this is part of our Journey home.”

As Jana said [Audio C @ 16:47], “I always look to the Heart. I’m more interested in feeling states now. And energy transmissions that are in the words. I kind of see us all trailblazing communication..... Creativity and communication.”

It can be more valuable to be asking questions than finding answers.

We live in a participatory Universe -- time to step up our creativity and participation.

“I think the more trailblazing aspects of us as a Collective are really pushing on Sound Codes. If the Similitude is Energetics and the Imaging is Holographics – leading us into more of our true nature. We’re going to have a lot of fun playing with this, I think, as we allow ourselves to open up and express ourselves!... And I think just a smile is wonderful.... that’s a beautiful language, the Language of Love and Unity.”

Summary: Quantum Field Entanglement, Singularity, Fractals can be summed up in the Knowing that we are created in the Image and Similitude of Source, entangled with All.
