

**Ascending Masters of Light Level 3 Session 6c**  
**Gathering Outside Light Temple**  
**July 7 2024**

**Melainah:**

So, I want to talk a little bit about our Unified fields, which are now huge. So, each time we raise and can consistently hold the increasing vibrations, our state of consciousness expands. And that in turn, expands our Unified fields. So, most of us are really not thinking about our Unified fields as we go about our day. I certainly haven't. I haven't developed that habit yet.

So, and what this means, is for example, like when you go to the grocery store, Costco, Walmart, or restaurant, or even when you're driving down the highway, your Unified field goes with you. You know, you don't leave it at home on a shelf. You know, wherever your body goes, it goes.

So, when you go into an environment where there are others, your field passes through them and they walk through your field, right? But because your current vibration, because of your current vibration, there is not a lot that sticks at this point, but however, some residue does, and it will build up over a period of time. So, kind of think of the windshield on your car if you were never to clean it.

So, it's important that we clear our entire field, but by means that are equal to the current frequencies that we now hold.

So, the Council has said it's time to upgrade our clearing processes. So, this following process has been created by the full Council in concert with our personal guides, and is being offered to each of us as we are stepping more fully into our unique Ascending Master experience. In following the protocols that have been established in these higher realms, you are invited by the entire Council of the non-physical beings of Light to participate in this offering. You are encouraged to integrate it into your practices.

So everyone take a deep breath and center. So let us gather in the realm where our magnificent Light temple exists. We will meet at the top of the steps where all is currently enveloped in soft, spiraling mist.

As we begin following the pathway, you will notice a new path has been created to your right.

Taking the new pathway, the mist begins to clear as you reach the end. So, take a look around. You can see that much has been occurring in this realm over the past two years.

An entire universal galactic cosmic complex is being created here.

Included will be enormous libraries, universal learning centers, and all manner of healing complexes. The goal is that most of this phase will be completed before we end this year, and we will return at that time and be given more details. But today, we will focus on what is complete and is being presented to you in this gathering.

So, in front of you is an amazing crystalline Light center. It sits in the center of a small island that is completely surrounded by aquamarine waters of liquid crystalline plasmic Light.

The center itself is comprised of four crystalline clearing chambers. Each chamber holds a unique quantum frequency of exceptional Light that has been calibrated specifically for each of us individually.

This is another of those incredibly magical creations.

I have discovered that the shape of the center changes from one visit to another. Sometimes it's a pyramid shape, other times a diamond or a cylindrical shape. So however, you perceive it is what it will be for you.
