

**Pathway of Illumination Series Level 2 Session 3b
Initiation Sequence Four and Light Infusion
Spring Equinox Sunday, March 22, 2026**

Melainah:

Thank you, Joan. Thank you, Kuthumi. For those of you who were on the call on Sunday, the presentation did not record, so we're having to re-record it today. And really early this morning when I was thinking about this and recording it again, the Luminous One came in and began communicating with me.

This particular presentation was once again totally different for me than any that I have done before. And while I was in the process of it and up until yesterday, I didn't have a lot of time to sit and ponder why it was so different. And so this morning I was still asking - why was this one so different? And so she shared some things that I want to share with you because I found them to be very helpful for me, and I think they will be for you also.

Because the transmission was so different in every single aspect of it, I contributed that to the elevating frequencies that we are now embodying. And that is absolutely part of it. But she went on to explain that since December, they have been communicating with us using our frequency range and word patterns. But beginning yesterday, the communication began evolving our communication abilities closer to their communication frequencies.

If you think about that, that's really a big leap for us. And it's just another example of the changes that are occurring, for and within us. She went on to explain, which I found really, really interesting, and probably we all know this on some level but when it's communicated clearly, you know, it's like that, aha, yes, of course, moments. And she went on to say that they, the Luminous Ones - they communicate in tones, and those tones have rhythm.

So now when we receive these transmissions and the frequencies that are coming with them, we have to translate those frequencies of their tones into words that we recognize and are familiar with.

So that makes perfect sense, but I haven't personally have not thought about it in that exact way. And so that clears up a lot for me. But then one or the other challenges I found in this particular presentation was when they speak.

I'll give you an example. Just when they, if you haven't heard this yet, you're getting a little preview, but they talked to us about returning to the Luminator in two weeks' time. So, my natural way of conveying that to you would be to transmit that using future tense. But all through the creating of this presentation, they kept correcting the tense. And it was a little, I won't say - well yes it was, it was uncomfortable because it wasn't the natural way that we speak to each other and communicate. But for them, they experience only present time. So when they are communicating, they're communicating in present time. There is no future tense, no future time.

So, it's all present in simultaneous time. And that was a big help. And you will hear that in this transmission, where when they do talk to us about returning in two weeks, they state it in present tense. So anyway, that's just a little update from this morning.

So, everyone will just take a breath and be centered. We will begin.
So, place your awareness on your presence within our radiant Temple of Light.
Acknowledge the presence of the many beings of Light who have gathered to witness our next steps.

Allow the frequency of appreciation to weave throughout our human collective as we continue on this magnificent journey of remembrance together.

With your intention, move to the Crystalline center where the four chambers are located. The Luminous Ones have prepared and activated each chamber with the precise frequencies that will best support you in today's initiations. With the calibrations already set, each chamber will only require a moment of allowing and receiving.

So, enter the Frequency chamber. The plasmic crystalline mist are already spiraling as you enter. Release all that does not fully support you on this journey, or that might impede the next sequence of initiations to be permanently neutralized, transformed, or removed.

Allow yourself to be in full resonance with the expanding frequencies of light that are enveloping you. Deep breath. Draw in your field.

Step out and into the Sound bath chamber. All things that are not in harmonic alignment with the upcoming initiations are now neutralized, transformed, or removed. Feel the soothing of the Sound vibrations as your body and your Unified field come into perfect harmony with your primary Sound codes. Take a deep breath.

Drawing in your Unified field, move to the Color bath chamber. The chamber is filled with a spiraling luminous Light of your prime Color codes. All that is not in alignment with the Light frequencies of the spectrum of your primary Color codes is now neutralized, removed, or transformed.

Receive the Light essence of the Golden ray as it amplifies the frequencies of your radiant Color codes. And breathe.

Drawing in your Unified field, step out and into the Harmonization chamber. The frequencies of the first three chambers are now being synchronized and harmonized, creating a state of precise balance and harmonic resonance that will continue to support you throughout the upcoming sequence of today's initiations. And a deep breath.

When you exit, your beautiful Luminous one greets you with a transport capsule waiting. Having arrived, you stand in front of that beautiful ornate set of doors, which open in recognition of the Luminous one. As you step into the entryway, they close behind you.

Beginning now, all transmissions for the remainder of this session come through your Luminous one. Take a deep breath.

Observe the frequency of the energy field in this entryway. Have you noticed any change in the frequencies since you first entered in December? Previously, we have not said much about the energy fields through which you have been entering and exiting. These fields are highly charged yet refined, and they serve multiple purposes.

Foremost, they ensure that the Luminator chamber remains pristine and uncontaminated. Your frequency is now recognized by this field, which immediately begins preparing your field for that of the Luminator and for the next sequence. Each entry is a preparation for what is to come.

Today, however, we will not immediately enter the chamber. Instead, turn to your right and move forward, remaining within the field. As you exit you step into a small alcove. This is a charming and intimate space.

Many unique and specifically chosen crystals are present here, providing soft lighting throughout the space. Just as with your garden, it appears exactly as you created. Does it appear as a cozy sitting nook? Or is it more like a grotto? Or a cave?

This is your sanctuary. Create it with anything that pleases you. Two lovely chairs are present here where we can sit together.

You have completed three sequences of the initiation process along with the additional infusion that was discussed in your council meeting.

Today, you enter the fourth Initiation sequence. With the receiving of this sequence, phase one of this process will be complete.

As shared in December, this is a multi-sequenced Initiation process that will be given in phases.

When sequence 5 opens, phase 2 begins. With phase 2, you cross another threshold. During your 2022 Light Conference, Archangels Michael, Uriel, Gabriel, and Raphael led you to the gateway of the 8th dimension. Archangel Michael spoke these words to you, "once we open this gateway and you enter, there is no turning back. There is no return path, only forward."

He asked you to state that you understood. From your current state of being, you are now well aware of how momentous the opening of the 8th dimension Time Locks were. Everything changed for you once you reopened them.

Entering into phase two will be no less momentous. This is why the frequency template for phase two will be placed at the very edge of your field on the completion of phase one and today's session.

Phase 2 will not be initiated during this session. However, its placement today provides your field the opportunity to begin recognizing the frequencies of the phase two template over the next four weeks before we meet again.

So, take a deep breath and receive these next words fully - you are invited, dearest one, to journey ever deeper with us into phase two and all that follows. As in 2022, there is no return path - only forward. Do you accept our invitation?

We have received your response. We continue.

Return your memory to 2022. When you arrived at and entered the doorway of the 8th dimension, that was where you and I reconnected. When you reopened your personal 8th dimensional Time lock, we were joined by two other Luminous ones.

Once the Light bundle was retrieved, the three of us began reconnecting your 8th dimensional luminous field of Light to the apex of the fourth Triad, the eighth chakra, to your Soul star, and your Earth star.

Those two Luminous ones whom you know well, are part of your luminous team. They are joining us beginning today.

As you are aware, each person in your group is connected to their own Luminous one. Just as all of you form a collective, we too are a collective. Your additional team members are part of our collective, along with many others. This means you have the benefit of not only the three of us working with you, but our collective working with your collective.

Our luminous collective in no way replaces your Council of Light. Together, we collaborate to achieve the best and highest possible results for you. We are not part of your council, but an extension of it. Like the concentric rings created when a pebble is dropped into a pond, our position would be in the outer rings.

We share this with you now, because as we proceed with the initiations, you may become aware that you are being observed. We also want you to know that every step of these initiations has been created with extreme precision, and care. They are designed to gently facilitate the changes occurring for and within you. Your body is never overwhelmed by anything you experience during these processes. We continually monitor and adjust the frequency ranges to the levels that stably support you.

When you're ready, re-enter the energy field, returning to where we first entered. Take another deep breath and enter the chamber. Greeting you are your two other team members. You know both of them and perhaps you remember their names. If not, you may connect later in the garden.

Initiation Sequence Four

Take your place on the crystalline bed of Light. We begin sequence four. Allow yourself to settle as the Light bed adjusts around you and illuminates.

The Luminator activates and you are completely enveloped in the glorious arc of luminous Light. Your image appears on the monitor.

We begin with the January sequence of crystalline Light particles illuminating on the screen. This group of particles and structures has received two infusions. The third infusion of refined Light is now received into each of these particles.

Observe as these Light particles become more and more vivid. As their frequencies elevate, inhale deeply, welcoming this infusion of Light.

These now fade from the monitor as the February sequence illuminates - having also received two infusions.

Take a deep breath and receive the third infusion of crystalline Light. Observe as each particle and structure becomes more and more brilliant with the increasing frequencies.

These remain lit as the January sequence illuminates once more.

The Luminator begins bringing these sequences into an equal and balanced state.

The December sequence, which has already received three infusions, now illuminates with the others on your monitor.

The Luminator now brings this sequence into an equal and balanced state with the others. Continue taking easy breaths as the Luminator brings all four sequences into a unified harmonic resonance. This is a slow, gentle, stabilizing process, which continues for many months. Observe the beauty of your inner Light as it radiates and is reflected back to you.

With today's infusions from sequence four, you have experienced a total of nine infusions of crystalline Light.

Sequences one, two, and three have now received three infusions each.

Beginning in December with sequence one, and continuing with each subsequent sequence, you have been building a very stable foundation within your physicality - created from the fabric of your own crystalline Light.

This crystalline foundation has been enhanced and infused with the purest Light from the realms of Source. Another deep breath.

With the completion of phase one, this foundation of Light becomes the new baseline and reference point for the functioning of these new unified crystalline Light frequencies within your body.

It is the beginning of a new inner architecture from which your Luminous body will emerge. And breathe.

What you have done and are experiencing is unprecedented.

Be aware of yourself on the crystalline bed. Feel it supporting your body. Your body is the physical expression of your Soul. This is why it has been referred to as a temple since ancient times.

Place your awareness inward and become aware of yourself as the Presence within your body. This presence is your Soul. Allow your Soul to view through your eyes, your illuminated image, as it appears on the screen. As your Soul, your body is reassured that it is safe and protected as it continues evolving. Another breath. With the sovereign wisdom and full intent of your Soul, your body now accepts and anchors this new Crystalline baseline. Notice how your body is feeling as this transformation unfolds. As the baseline continues to stabilize, the Light quotient of your physicality increases.

You have done amazingly well. We are very pleased.

Today's initiation sequence and phase one are complete. The Luminator powers down and the crystal bed lowers. Slowly, you sit up and gently stand.

Instead of moving into the garden, you find yourself returning to the alcove where more is shared. You re-enter the energy field and pass through - back into the alcove. Take a moment. Allow yourself to settle, and reflect on all that has occurred since you first entered the space.

This alcove is an extension of your luminous garden. The frequency of this inner sanctum is similar to that of the open garden, yet designed with additional frequencies.

One of the most significant of these is the frequency of sacred Silence. This silence contains quality unlike any experienced in your outer world. It is not empty silence, but a conscious Silence comprised of Light and Presence.

Like the garden, these frequencies will support you through the changes occurring within your physical body and your Unified field.

This alcove is an enclosed space, and within its design are silent tones. These tones emanate from the crystals present here, and from the fabric of the sacred Silence itself. Deep breath.

In this moment, that sacred Silence establishes harmonic resonance with every activated crystalline Light particle and structure within your body. Take a couple more deep centering breaths.

As you receive and integrate what we have just shared, remain here in this nurturing and magical space for as long as you would like.

Later, when you are ready to leave, venture further into the alcove. As you reach the back wall, a hidden passageway reveals itself, leading you into the garden. You become aware of how the spaces interconnect and how you may return with ease - either through your intention or through the pathway.

Over this next month, allow your body to become a priority. Many changes are now in motion on every level of your being. You begin listening in ways you have not before. In your quiet time, see your body as Light, as it was revealed to you on the monitor.

Return to the Luminator in two weeks, where your entire system receives a frequency attunement and refinement. This ensures that your physical vessel maintains perfect harmonic alignment with the crystalline baseline and the changes occurring within your body. This is in addition to our continuous monitoring and adjustments of your frequencies.

This attunement significantly assists in preparing you for your next gathering - where sequence five opens and phase two begins. With our communication already established, you let us know when you are ready to return. The protocols remain the same. And we will meet you as you exit the four chambers.

We await your return to the Luminator in two weeks. And again, in your next session, April 19th. Until then, we are only a thought away. Blessings, dear ones. This session is complete.

Joan: Blessings.
