

Illumination Series Level 2 Session 4b
Sequence 5 Phase 2 Light Initiation
Sunday, April 19, 2026

Melainah:

Everyone, take a deep centering breath.

And be aware of yourself within our Temple of Light. Another deep breath.

Luminous One(s):

Greetings, beings of Light. We are the Luminous Ones transmitting as a collective to your collective. You are receiving this transmission through the magnificent Light and amplified Sound frequencies of your crystalline Temple of Light, which translates our tones into sounds that are familiar to you.

During sequence four, we referenced your opening of the 8th dimensional Time Locks. With those openings, you entered a new level of remembrance. With the completion of the Ascending Masters of Light series, you completed a full turn on the Ascension Spiral.

The 8 8 8 8 series ushered you into a liminal and luminous space, preparing you for the next spiral. This continued into phase one.

Today, you enter phase two. With conscious knowing and with intention, you enter the next turn of the spiral. You received and accepted our invitation. However, something preceded that invitation. It was a signal reaching your field; a signal that you were already in resonance with. That signal did not originate from us. It was issued from the purest Essence of you that remains beyond the veil of forgetfulness, into the realms of Remembrance, calling you, inviting you to go more deeply.

Inhale slowly. Release slowly. Notice how you feel in this moment. Now you are ready.

The Light and the Frequencies within your temple begin to swirl and spin. The mist begins forming around you with each revolution; accelerating, spinning faster. Your temple dissolves into the brilliant Light that it is. Spinning faster now. Our Luminous collective recedes.

I, along with L1 and L2, remain with you in the spiraling vortex of Light and mist - beyond space, beyond time, beyond all dimensions, The spiraling slows and stops.

Within the mist, you see the majestic, beautifully ornate doors. Notice how they appear. The doors open. You enter. The entry too is filled with mist.

You have entered the spiral of phase two, and crossed the next threshold of no return. Take a moment. Be conscious and aware. It has already begun. You have entered the spiral of phase two. And sequence five begins. Take a deep breath.

You enter the Luminator, which is completely transformed. Before you is a seemingly endless expanse of luminous, vibrant Light. There are no visible walls, no ceilings, no monitors, no control panels. They were created for phase one to provide structure. Take another moment. You begin to acclimate to this new, highly refined environment.

This iteration of the Luminator is not a chamber. The Luminator is an immeasurable hyper quantum field of living, conscious, intelligent, luminous Light and Sound frequencies. The unlimited totality of this indescribable field is the Luminator. It presents as an open space with nothing enclosing it. And yet, it is a distinctly defined field of sacred Presence.

The ultra luminous Light of this field is beyond anything you have experienced to date. This Luminous field is alive. This is the Creative field of the highest intelligences. It is supra consciousness and was aware of your presence long before you arrived.

Take several deep centering breaths as your field gradually stabilizes in resonance with this luminous, creative, living field of Light. Everything you observe and experience here manifests from the field itself.

Before you is a crystalline Light bed. Free floating. As you approach, it lowers or rises, allowing easy access. It also rotates. Its shape resembles a chaise lounge, allowing you to sit more upright. It appears and feels solid and is composed of specialized high frequency Light and Sound. As you settle, it conforms to your physicality. Your awareness comes to rest at a distance from the Light bed.

Manifesting from the field are four massive obelisk-like forms. They are positioned around the Light bed at the four points, reflecting the pattern of your hyper quantum Diamond. These forms are ultra-luminous intelligent streams of pure crystalline diamond Light. Breathe.

With your awareness on the stream positioned below your feet, your field comes into alignment and into resonance with this ultra luminous Light intelligence. Conscious breaths.

The Light bed rotates to the point on your right. Again, your field comes into alignment and into resonance with this ultra-luminous Light intelligence.

The bed rotates to the next point. Your field comes into alignment and into resonance with the intelligence of this ultra luminous Light stream. Take a breath.

The Light bed rotates to the fourth point, and your field aligns and into resonance with this ultra luminous Light intelligence. The crystalline bed returns to its original position.

Be aware of these four magnificent streams of conscious luminous Light surrounding you. Each stream is independent of the others, and yet, they can function either separately or collectively. Continue with your conscious breaths. Many changes are already occurring.

Entering the Luminator field and aligning with the four numinous crystalline Diamond streams is the first level of today's initiations. Remain present and aware in this moment as all four living streams continue to synchronize and enter into harmonic resonance with your Luminous field. We continue.

As previously mentioned, there are no monitors. Instead, your image appears as a hologram. This hologram has the ability to display in 3D and beyond. It can also create simulations, which provides expansive opportunities to experience what is occurring more deeply. Within the vibrant dynamic field of the Luminator, directly in front of you, L1 opens the hologram.

Your image is mirrored in 3D with less density and more transparency. The crystalline Light bed begins to emit and envelops you with luminous Light. You may feel a tingling or warmth as the Luminator scans and records your current frequency ranges into the field.

The three of us remain with you, overseeing and monitoring each layer of sequence five. In phase one, we focused on your physicality.

Phase two shifts to include your Unified field as well as your body. Observing the hologram, your Unified field appears as a halo of Light around your body. Your field is massive.

For these initiations, it appears in a more contained form. With your awareness still on the hologram, your Earth star appears. It appears below your feet as a simulation within the hologram.

Above you, your Soul appears. Both are multi-dimensional, serving multiple purposes. Today, our focus is on what supports this session.

Your Earth star is the ultimate anchoring point. Your Soul star serves as a quantum frequency filter, for the highly refined Light infusions entering your body and your field. They are designed to work together, creating harmonious balanced anchoring points within your ever expanding luminous Unified field.

Deeply imprint this awareness and visual image. It greatly assists you in anchoring and stabilizing the ultra-refined frequency levels you are beginning to experience in phase two. Take a breath. And we'll continue.

With the attunement you received since the last session, your new inner architecture and crystalline baseline have anchored and stabilized more rapidly than anticipated.

Your now unified Crystalline Light frequencies have increased significantly. As a result, and with the amplifications you are experiencing from this expansive field of luminous Light, you are ready for the next level infusion.

The crystalline Light bed fully activates. Observe the hologram as all other crystalline particles and structures of your crystalline baseline are brilliantly illuminated. The frequencies emitted by the four luminous streams around you are exponentially stronger than any you experienced in phase one, even at their lowest levels. For this reason, two of the light streams will engage. This ensures a gentle infusion while continuing to increase your Light frequencies and vibrational rate.

The intensity of the stream above your head and the stream below your feet begins to increase gradually in synchronized coherence. Each emits a brilliant stream of luminous Light forming a bridge of light over you.

Receive this infusion like a gentle waterfall of soft Light bathing you in pure conscious crystalline Diamond Light, infusing and amplifying every crystalline particle. Breathe and receive.

Observe the hologram, as this luminous infusion of Light now expands into your Unified field. Again, breathe and receive this brilliant infusion of living Light into all aspects of you. Conscious breaths. We continue.

Observe how brilliantly illuminated your body and field are.

Be aware of yourself as the awareness and presence within your body. Through your physical eyes, your presence observes the hologram. Experience and feel your Divine presence within your body; remembering your presence is Your Soul. Your Soul is your presence. Your body is the physical expression, the sacred Temple of your Soul.

Your Unified field also is an expression of your Soul. Your presence remains within your body as you continue observing your body and your Unified field within the hologram.

Within the simulation observe; the Light essence of your Soul illuminates within your body and your Unified field as a transparent, soft hue of your primary Color code. Take a breath and continue observing.

From your Soul presence within your body, a deeper expression of your Soul essence emerges over your body and your field as a luminous Light in the same primary color, and remains there.

Slow, deliberate breaths. Remain very still. There is nothing to do - only observe.

Be very present and in appreciation as the witness and the experiencer of what is unfolding. In this moment, the differing frequency ranges of both expressions of your Soul come into harmonic coherence. Continue taking easy, gentle breaths.

Coherence is achieved. The deeper expression of your Soul is now received by your body and your field. It softly anchors with stabilizing coherence to your Earth and Soul stars.

More of your Soul is revealed and remembered.
In this sublime state of Presence, remain here with us.

This session is complete.
