

John:

Everyone remembers back in the 2019 Light Conference, when we were addressed by Lord Melchizedek and he invited us into the Order of Melchizedek. And I sure remember. I got this Star stuck right in my head! And I assume we all did. But this entrance into the Order of Melchizedek has physically prepared us for carrying a Pillar of Light. And that we got at our recent Graduation Initiation.

So, it is very important that we have taken all the time necessary to prepare all the physical components for this Cosmic manifestation that we have tonight.

And in addition to being prepared by becoming Brothers and Sisters in the Order of Melchizedek, Metatron has asked me to say that it is both my duty and my honor and my joy to introduce to everyone the Great White Brotherhood. I know that they sustained me for many years before my path led me here. And they probably did you, too.

The White Brotherhood watches over the Energetic Nodes of the Earth's Energy Field. They watch over Holy objects that descend and ascend back again. They bring in increased vibration through the geometric symbols.

I actually got to look in that White Brotherhood. There's 72 different Orders, all within that one Great White Brotherhood. I didn't know that. But it's a vast Collective Consciousness that comes from the Elohim. We know that they come forward and teach us, as our Teachers have.

They are both personal and impersonal. Sometimes they are Brothers and Sisters. Sometimes they're Teachers. Sometimes they're Archangels. They all have guided us in our Path.

We shouldn't be surprised to see members of the White Brotherhood on the Sirian High Council or in the Pleiadian Constellation of the Seven Sisters. And yet, we know them as Archangels here on Earth. So, it's a huge group, a vast Collective Consciousness.

We're going to need them and you're going to meet them, if you don't know them already, to complete our work tonight and in this coming year.

I really want to say something unrehearsed. They can give me the boot later, but that's all right!

Today I relistened to our Graduation. And you probably heard something about a student is only as great as their Teacher. Well, I was thinking, and you know it's hard to sneak up on God, so He probably knows about this already.

Let's just take a moment and give a silent, louder than words thanks for all of our Teachers, even for the last.... well, it could have been for 2000 years. But all of our Teachers, ever since we were created that have so patiently watched over us, taken their time, taught us everything we needed, watched over us some more.

You know, I think really, let's take a moment and thank the Creator, the All That Is, for creating Beings like us who can experience Love and Light and Life. And, in Andy's words: "Transmit!"
