

Greetings, Beloveds, It is Metatron.

The purpose of this Gathering, this evening, is to co-create and bring into form, as well as to set in play, the Energetics of the next Iteration of Christ Consciousness. We do not take this lightly....

Nor do we think that you do. You have agreed to hold these massive Energies within your body to facilitate this very important Service Project, bringing Light into form, through your bodies, through the 5th-6th-7th Dimensional Light Templates that you have carried for some months now and have transmitted often in your monthly Service Project. And for this, Humanity will profit.

These massive Energetics that were needed for the entire Service Project were quite vast..... The purity of these Energetics was important for you to recognize..... These Energetics were needed for the entire Service Project, first to complete the Holographic Energetics that had to come forth in their entirety.

And this caused some of you to be confused, because these Energetics were so massive. And we asked you to integrate these vast Energetics in a short period of time. Now that some integration has occurred, we want to talk about how and why you had to be prepared as these Energetics entered your body.

You were given an Energetic reference point of the Pink Diamond. Now, let us clarify that we are using the basic Pink Diamond configuration. You, as a Community, are now capable of using a prolific, fertile, and inexhaustible geometric progression through the 12th Dimensional Magenta Color Codes that you have received. This is the version that you are capable of using and holding in your body and Consciousness.

Because of our concerns for the safety of the body and the neurology of the brain, it was decided NOT to use the prolific Pink Diamond but to use a basic geometry of the Pink Diamond and initiate it into a more active function. We brought in a level of the 6th Dimensional Light Template of Equilibrium in the Magnetic function that we could use in a 5th Dimensional function. Although you are capable, very capable, of using the 5th-6th- and 7th Dimensional functions of these Light Templates, the majority of Humanity as well as the Earth are not ready for this yet.

You also had to complete your Graduation Initiation, so we assisted you to create a Personal Pillar of Light that could be used to support specific points of the basic Pink Diamond. This Personal Pillar can also be used in all personal work in your Ascension process.

[5:11] Next, through the interface of the Platinum Ray, we helped your Personal Pillar take on some of its Master Energetics to form a Cosmic Pillar of Light. The Cosmic Pillar of Light will be activated during this Gathering.

Now that these personal Energetics were taken care of, you are ready to move forward into the second phase of this Service Project. We could not explain in depth the massive Energetics of this activation but had to trust your ability to integrate a level of the massive Holograph and experience some of the Energetics.

Here again, this Holograph had to be transmitted as a unit and could not be divided. We trusted you to absorb what was needed. And, Beloveds, you did just that with the support of the entire Seating of the Divine Crucible. You stepped up to this challenge and did not waver. Now we are ready to proceed.

So, take a deep breath and welcome Melainah, Mariam the Magdalene, and Yeshua.
