

Greetings, Beloveds,

It is the Triadic Collective Consciousness of Lord Metatron, Lord Michael, and Lord Melchizedek.

We are delighted to be with you, united in this Collective Consciousness. And I ask that you each take a deep breath now and feel your unification with each and every member, that are physical members, of this Collective. And also, know that unified connection with we Lords of Light, all of the Archangels, all of the Angelic Realm, the Ascended Masters, the Elohim. We are united in the vast Source Imaging.

So, as we speak to you this evening, don't see us as above you or beyond you. See us as old friends gathered together in this Collective session and feel it in your body. This becomes much more real to you because of the presence and the activation of that 4th Triadic system, engaging your 9th, 10th, and 11th chakras into a much different state of functioning.

We'd like to begin our session with you this evening and put some specific information and practices, that you have learned a while ago in your MA teachings, into a usable and energetic and active state. Often times, humans are not ready to receive the full active energetic state when certain concepts are given. They are given and planted within your consciousness. But the actual activation and usability comes a little later, as you have the time to integrate and experience a progression of energies, of Light frequencies. And so it is with a lot of things that were seeded in your consciousness during your association with the Mastering Alchemy teachings, that we also facilitated for you.

We begin this teaching with a review of the **Seed Crystals** that are located in your head region or in your **Ajna center**. There are three energetic Seed Crystals that lie in a triangular shape in the area of your **3rd Eye**. There is a Seed Crystal above each of your physical eyes, just above the center of the brow, and a third one that forms an apex of an equilateral triangle just above the third eye. These three Seed Crystals have remained dormant until specific vibrations could be activated within your Unified Field and within your physical body.

The vibrations of the **4th Triad** greatly affected the usability of the Seed Crystals, as well as the **Arc of the Covenant** and your ability to create **Ze'On Particles**. The **10th chakra** holds the **Christed OverSoul** and the **Christed Mind** and interfaces with your mental body through your thoughts that are created from a merged state of your **Higher Self** and your **OverSoul**.

This was not possible until the descension of the **8th chakra** into the body. The 8th chakra contains a functioning OverSoul. The OverSoul is specific to you as that individual expression of the Divine Image. It is your **Soul**, it is part of your Soul expression, from the wisdom of all the incarnations that you have ever experienced. With the descent of that 8th chakra and the Presence of that OverSoul, the OverSoul was able to reside in the physical body and in an expanded and energetically refined Unified Field.

The 4th Triad and the Arc of the Covenant greatly affect the functioning of the etheric Seed Crystals. The stable and consistent **electrical charges** that emanate from the 4th Triad engage the body's consciousness and lift it to a more refined level. This is important, because when the body is still operating at a 3rd/4th dimensional level, it doesn't have the refinement that is needed. So the engagement of that 4th Triad and the electrical charges altered and refined the state of the physical body's consciousness. The frequencies of Undifferentiated Light begin to alter the body's vibratory level. And the **specific Sound currents of Light and Color** are brought forth.

The three Seed Crystals begin to vibrate in resonance with the particular Sounds that emanate from specific Colors coming from that Undifferentiated Light. These Sound Currents alter the function of the **2nd Triad**. The entire 2nd Triad now begins to HUM in a coherent resonance with the Sound Currents produced by the Undifferentiated Light that resides in the **11th chakra**. The **3rd Eye, Pineal, and Medulla Oblongata** vibration consistently increases, as it is consciously used and Undifferentiated Light is applied, using the compression mechanism to differentiate it by creating a Liquid Light, a Nectar Light, or a Laser-like projection of Light to assist the physical human form to resonate in the 5th Dimension.

The etheric Seed Crystals continue to stimulate a constant and coherent Sound Current. The current is stimulated by the electro-magnetic charges that emanate from the 4th Triad and affect the Arc of the Covenant. A precise field of electro-magnetic charges is always present in these Seed Crystals. The field creates an electrical-magnetic environment that continually supports a flow of electrical charges to keep the Seed Crystals producing Sound Currents. This changes the function and vibration of the entire neurology of the body. The brain then can process complex thought that comes from holographs and holographic projections -- very rapidly.

Huge blocks of memory codes that have been kept in the Causal Body become available because a **fourth Seed Crystal** has been activated. It resides above the right ear and is often called the **Recorder Cell**, because this Seed Crystal holds every thought and action that your Soul has chosen for every life experience that the Soul had in an incarnation in a bodily form. That's the individual expression of you as the Divine Image.

Massive amounts of creative knowledge are gained as the 2nd and 3rd Triads function in an elevated vibratory state. Proper functioning of the Seed Crystals is an important part of transforming the human form into a **Light Vehicle**.

It is important for you to recognize that the Seed Crystals are stimulated by the Sound that emanates from the **Indigo Color Codes**. The Indigo Color Codes emanate from the Undifferentiated Light of Source. These Codes are electrical in nature, so you can see how the electrical charges that are now available through the 4th Triad and the Arc of the Covenant are important events that had to take place in the last few weeks of your time. The Indigo Color Codes have always been present in your **6th chakra** but in a dormant state, very much like the Undifferentiated Light that resided in your 11th chakra but is now available to you, because you have not only the consciousness but a different vibrational frequency within your body and your Unified Field – that you created.

Information about the Indigo Color Codes was given to you in 2015. Many of you have called upon these Codes repeatedly over the last two years of your time, without fully understanding the significance of what you were calling into your energetic field. So we are here to tell you that from the level and wisdom of your Soul, you knew this specific Color Code was very important to you. And even though it wasn't fully understood or wasn't fully usable, you continued to call it forth, in your awareness and in your energy field. This speaks volumes of you and the wisdom that you hold. Recognize that!

When you called these Color Codes into your energetic field, you did so to amplify your ability to use the 2nd Triad and the upper chakras as well as create Ze'On Particles. For the most part, the Indigo Color Codes have been put aside because of the lack of full understanding of how they create more refined vibrations in the body and assist you in creating a complete and stable Arc of the Covenant. There was no specific direction in their usability in the creative process -- until now. Now, you are ready. Now you have created the field that will accept and absorb these massive Color Codes.

The total absorption of the Indigo Color Codes was unavailable because the 4th Triad and also the **5th, 6th, and 7th Dimensional Light Templates**, that you retrieved from the time locks, had not been retrieved yet. The Arc of the Covenant was not emanating a full charged electrical field. Now this has been accomplished. You are ready to use and understand more fully the Indigo Color Codes.

The Indigo Color Codes are immense Sound frequencies that are held within the Indigo Color vibration. They are electrical in nature, facilitate the creation of a more refined electro-magnetic field around and within the body.

The Indigo Color Codes expand the 2nd Triad, which we have said. And this 2nd Triad is your creative center that creates a form within form.

The Indigo Color Code expands the **Pineal Flame** into a brilliant Indigo Color. And this Color carries with it a very specific, refined Sound expression. The vibration is consistent with the Christed OverSoul and the Christed Mind. This is you, as Spirit occupying a body and reflecting your Christed and Divine Image. The Medulla Oblongata is also expanded by this Sound/Color Coding and impacts the Arc of the Covenant so that it is more functional and creates the necessary electrical charges.

Because of the merged state between the flame in the Sacred Heart and the flame in the Pineal, the Indigo Color Codes are easily transmitted and unified within the flame in the Heart. This alone increases the functioning of the Sacred Heart, making Christ Consciousness present in your creations. In the Presence of these Codes, you are always aware of the existence of the Holy Spirit/Shekinah and the consciousness of yourself as a Holy Spirit.

Because the Indigo Sound vibrations and Color Codes are now seated in the Sacred Heart, your ability to know yourself as the Divine Image is constantly present. It's no longer elusive. There is a constant flow of that consciousness within you. The **Luminous White Star Tetrahedron** vibrates at an even greater frequency range, reflecting your Christed creations back to Source. As Source reflects to you individually, you also reflect back to Source your Christed Image in form. How beautiful!

The Indigo Color Codes are composed of three merged Color Codes. The first is the Blue Color Code, which is associated with the emotional body. And you have used this Code very successfully for a long time. So it is functioning wholly and completely and helps you tremendously to keep your emotional body in a more expressive, Divine way. It helps you create the emotional body that is operating in a refined state. The second one is the Golden Christed Coding that relates to the Yellow thought frequencies that have been transformed into operating as the Christed Mind. So thoughts that are thought are in the frequency range of the Christed Mind. How expansive is that! The Indigo Color/Sound Codes are immense. This is the third layer of this massive Color Code. They are immense and the function is in a refined frequency range.

The merging of the Color Codes takes place in the flame of the Heart. A good visual for you at this time would be one of gazing into a physical flame, whether it be a candle flame or from some other source. Sometimes when you gaze into that flame, you will see that there is this golden yellow flame, and in the center is almost a luminous white, and on the outlying edges there are blues and purples. So there's a blending of these colors in a flame.

Begin to see these three Color Codes interacting along with that Luminous White of Undifferentiated Light of Source, which is represented in the unified state of the Sacred Heart by the Luminous White Star Tetrahedron.

These Color Codes come together in the flame in the Heart and in the flame in the Pineal. And they represent the Undifferentiated Light, but yet also represent the Undifferentiated Light from Source as it descends through the chakra system into the body, where it becomes differentiated according to the applications that you make with it and the intention of the individual who is in an embodiment.

The Humming produced by the Indigo Color Codes and the Seed Crystals is not recognized by the human ear because of the distraction it could cause in daily life as the process begins to take place. Some of you will feel the Sound Current through your nonphysical senses. Some will occasionally feel a slight vibration through their clairvoyant channels. This happens only when quiet attention is placed in this region of the head. There must be a quiet, neutral space with no thought for you to use your nonphysical senses proficiently. Some will then pick up the slight nuances of these very refined vibrations. And, as you become accustomed to that vibration of the Seed Crystals and the Indigo Blue Color Coding, it becomes very much a part of your energy situation. And you become accustomed to it. And you will then, eventually, either by feeling it or knowing that the Humming is occurring, that the Seed Crystals are humming continually in that Sound frequency.

What is important is that you are consistently placing your attention to the massive electro-magnetic field that is being created in the Arc of the Covenant to stimulate the usability of the 3rd and the 2nd Triads. With these activations, your abilities as creators increase dramatically. Notice how you can create Light frequencies and vibrations within your body now. Before this activation, Light had to be drawn from the 11th chakra or Source energy.

The further functioning of the Seed Crystals and the effects that they have on the cells of the body help the body to consistently and coherently hold these electrical-magnetic charges that are emanating from the Seed Crystals Sound vibration. As this occurs the body begins to shift into a more refined frequency range of the 5th Dimension. The body then doesn't find it so difficult to receive the finer elevated Light emanations that are produced in meditative states or prolonged immersions of SoulSpirit consciousness within the body. The body is slowly coming into a resonance pattern with the Light that is being created in the body. The body then begins to emanate a higher vibration. There is no longer is a great variance between more refined states of consciousness that produce higher frequency ranges and the body's vibratory state. It's becoming a unified expression of you as Spirit.

Now let us return our attention to **the Arc of the Covenant and the creation of the Ze'On Particles**. Because the 4th Triad has been somewhat activated and is functioning coherently, it amplifies the electrical charges that come from this center. You are able to create the Ze'On Particles easily and also precisely because of the further activations and presence of the OverSoul, the Christed OverSoul, and the Christed Mind in the body and energetics of the Unified Field. Your fourteen-chakra system functions in a more coherent and unified state. This is important for you to notice often, consistently. Feel the vibratory sensations in your body and in your Unified Field. This takes your attention as well as the use of your nonphysical senses that you are beginning to develop.

Ze Particles are Light Particles that come from Undifferentiated Light and the creative Mind of Source. You then create the On Particle as you receive the stimuli from the electrical charges coming from the Arc of the Covenant. With your OverSoul, your Christed OverSoul and Christed Mind intact and functioning, you create the On Particles that reflect your Divine Image as a creator in form. The On Particles are created through your transformed mental-emotional body that is now functioning through a refined Christed Mind. So it is the merging of the Ze Particle with the On Particle that you create that produces a Ze'On Particle in its unified state.

The mental-emotional body has constantly been impacted by the electrical charges coming from the 4th Triad and the Arc of the Covenant. Your mental-emotional body also is now receiving electrical codes from the functioning of the Indigo Color Coding and an amplified, open Sacred Heart. All of these activations are necessary in order to create a Ze'On Particle of fully charged Light. Your mental-emotional body must be in resonance and coherency with your Christed Mind and your Christed OverSoul.

Ze'On particles are designed to replicate Source creative Thought as it is used to manifest in perfection. You replicate this manifestation through your Divine individual creation of a Ze'On Particle. You cannot create an operational Ze'On Particle if any of the energetic pieces that we have just mentioned to you are missing. Your body, mind and Spirit must be functioning at its optimal Light frequency and vibration as a Christed Being.

These energetics are still new in your consciousness, so do not expect to be able to create and manifest consistently with these Ze'On Particles. A full integration of these massive templates takes time and constant application. There will be times when you have created a coherent energy within all levels of yourself and will know success in creating a Ze'On Particle or Particles that you see manifest in your reality. You'll see it and know it. You will have to develop your Unified Field a little further in order to create the consistency that you want. Don't judge in this process; just continually place your attention there.

Just as it took time for you to be able to apply some of the retrieved Light Templates from the time locks, so it is with these vast energetics that we are now giving to you for your transformation and Ascension.

We see that you are beginning to realize what we meant when we told you many years ago that you were a vast and complex Christed Being. You are so much more than what you thought you were then. As you continue to create under our guidance, you will see so much more of who you are.

We suggest that you take time daily to not only review but also apply the various Light Codes/Sound vibrations as well as receive the immense electrical charges that emanate from the 4th Triad, the Arc of the Covenant, and the Seed Crystals. View the energetic state of your mental-emotional Body daily. Notice how and in what state it is functioning. Here again, it's important to stay out of judgment. This will not help you. It will only create obstacles.

When we next meet, we will have a group discussion and a Question and Answer session. Come prepared with your written experiences in how you applied the concepts and energetics of what we have given you in this session. Write your short comments and questions so they can be said in a few, very few sentences. In this way, everyone has an opportunity to participate. Group participation teaches Unity and the power of a Collective group to expand consciousness and the frequency ranges of the Unified Field. This is very important for you to realize, Dear Ones. It will help those who have trouble voicing, when you realize that you are such an important part of the Collective and the work that this Collective can produce in that unified state.

So now, take a deep breath and get centered in your Sacred Heart. Be very present in this moment. And we will begin our closing meditation.
