

Greetings, Beloveds, It is I, Gabriel.

I come in the full composition of all of the Archangelic Realms, and especially the Four Archangels that are within your Crucible in that Sacred Diamond configuration. This is important for you to recognize, because it is a Magenta, a beautiful, glowing Magenta Color Code that raises your awareness and your consciousness to the level of your Spirit and that SoulSpirit that is merged together in Unity.

We come in the Element of Love, the Love that is felt within the Crucible, within each of our individual Sacred Hearts, and within the Collective Consciousness of the All That Is. These are all aspects, Beloveds, of Unity Consciousness.

So, as the Lords of Light talked about in the last session and Yeshua talked about, it is so important to find the pathway into that sacred and holy space within each and every one of you. And that sacred, sacred space is your Holy Sacred Heart Center, where all of your Consciousness, all of that 12<sup>th</sup> Dimensional Consciousness, sits in its glorious expression, having within it that luminous White Star Tetrahedron that you received and acknowledged in that space five years ago.

It is such a short increment of time sequentials that it's hard to realize that, in this sacred space that we all share the Beauty with the Divine, with the All That Is, that there is no time, no space – just pure Undifferentiated Love and pure Unity.

Take a deep breath now and FEEL that Unity,  
    how expansive and all-encompassing that that is.  
Be in that sacred Crucible that you created.  
And be in that Sacred Heart Center.....

Not only do you feel the Holiness of this Center,  
    because it is the direct gateway to that Godhead Consciousness of which you are One.  
There is Joy that you now feel... And the Ecstasy,  
    as you unite your individualism with the Collective Consciousness of the All That Is.  
Allow yourself to experience that... at this very moment.....

Take a deep breath...  
Feel the Love...  
Know the Joy of Unity.....

Another deep breath,  
And let us begin.....
