

JOAN:

Well! This is Joan.

JOHN:

And this is John.

JOAN:

We are so excited to be with everyone today in this follow-up session for Seating the Divine Feminine and Masculine energies on Earth. It has been a most wonderful experience, and I hope everyone else has found it very expansive.

Now when we decided to do this, we were actually guided to do it, we had no idea that, at the beginning of all this, that it would be so extensive and so connected to Unity Consciousness, which you all know is one of the basic templates, energetic templates, for the 5th Dimension to be seated on the Earth. And it's not just 5th Dimension anymore; it's 5th/6th/7th Dimension.

So, this is a significant piece of work that we are doing here together.

JOHN:

And of course we feel very honored to have been part of this first communication on such an important subject. It's really, we do feel that honor.

And, in our communication with Yeshua and Master Kuthumi, they've told us that there will be more to follow on this, and also on the subject of Unity Consciousness.

Now to get started, let's all take a deep breath and help Joan in bringing forth Archangel Gabriel for our centering meditation.

[1:44] ARCHANGEL GABRIEL CENTERING MEDITATION, through JOAN:

Greetings, Beloveds, it is I, Gabriel.

I come with many who have gathered in this beautiful Crucible that you have all created together, this Collective Consciousness that is composed of the physical realm and the nonphysical realm. For there are many in the Archangelic Realm, the Master Realm, the Lords of Light, and the Elohim who have gathered with you to create this energetic template of Unity that is founded in your awareness that the masculine-feminine attributes are not gender related, related to your body, per se. But they are related to that Divine Image, having qualities and attributes of Source.

So, if you take a deep breath now, and begin to relax, let go of the thoughts of the day, all of the events, and become very centered in that Holy Crucible that you have created – the Crucible of Love in your Sacred Heart. Immediately you begin to see the spinning of that luminous White Star Tetrahedron, that you are now very much unified with the energetic components of that Star Tetrahedron. It brings more into focus who you are in that unified perspective of Source. Having experienced the energetics of that Star Tetrahedron, that luminous White, there's no longer any doubt within you that you are unified with your Source.

Experience that feeling now, in the very core of your Being. Feel it in your Heart center, in your chakra, in your Heart chakra. Notice how that 1st Triad is spinning. It is filled with the Holy Spirit; it is filled with the luminous Undifferentiated Light of Source. And as it spins, the vibration has become altered, is refined and expansive. It extends into the 2nd Triad, where it too spins in that higher refined vibration of Love and Unity... And into the 3rd Triad, spinning in that very refined vibratory level of Love and Unity.

Notice also now that sapphire Blue Star Tetrahedron that sits above your Crown and connects your physical chakras with the nonphysical aspects of you, in those seven chakras that pertain to you as a SoulSpirit. Notice how the spinning is very refined. It's a brilliant glowing sapphire Blue as it engages the upper seven chakras. And you begin to truly experience the Unity Consciousness of your Source, filled with that Undifferentiated Love and Light.....

Allow yourself to engage in this very refined energy... Begin to know yourself as Divine..... [Pause]

Truly you are a Divine Being of Light..... [Pause]

[9:33] Be very aware of your Divinity and the aspects of yourself as SoulSpirit...

Now, be aware of yourself as the individual Image of Source in a body that is resonating a vibration of Love and Unity, so that you truly know the fullness of who you are.....

Breathe in, Beloveds, the fullness, the refinement, the Knowing, and this experience that will be with you for eternity.....

Now bring this state of consciousness fully and completely in awareness of yourself as part of this Collective that has gathered together...

Bring your attention fully and completely into the present moment...

[12:06] JOHN'S REVIEW OF THE FIRST SIX SESSIONS:

Thank you, Gabriel, for that wonderful meditation and all the Love and Energy that you've given us. We are truly thankful.

Now, Yeshua and Master Kuthumi have asked us to start this session with a short review of what we did in the first six sessions, so --

Number 1: We went over some important history of the Earth and how the split between the feminine-masculine happened. Of course, one of the most important parts of this whole series of teachings was created in the first session. Together we created a Crucible of Love in the Sacred Heart to hold more of the vastness of our Being. We continued to use this Crucible throughout the six sessions, to reinforce and expand it.

Now in Session 2 we're exposed to how we currently use the fallen feminine-masculine template and how to change our approach. Again, we always return to the Crucible in the Sacred Heart.

Now Session 3: In this session, we discussed the attributes and qualities of the masculine and the feminine. We also were to experiment with choosing an attribute from the other column and make it one of our own. During this session, we created a Star Tetrahedron of brilliant White Light, that was made of and filled with Undifferentiated Love and Light. We seated it in our Sacred Heart to hold the template of the Divine Feminine-Masculine in Unity. What a powerful activation that was!

Now in our 4th Session we heard from Anna, Mother Mary, and Mary Magdalene. The focus of this session was not just on the Divine Feminine Triad but using the Divine Feminine as a vehicle to bring the Divine Masculine in perfect unison and seat this unison in the physical body. An awareness was opened to know both the Source and yourself as a balanced, unified Being with both feminine and masculine attributes.

We also began to integrate these Unity concepts within the mental-emotional body to create balance in our thoughts and emotions, so that we can manifest more precisely in form. Now, Session 4 was a very important session because it started to develop a state of consciousness from the vastness of our Being as a SoulSpirit.

Now next in Session 5, Yeshua and Master Kuthumi, in a merged state, helped us further seat the energies of the luminous Star Tetrahedron into our bodies, into our energy systems, and into our consciousness. The Star Tetrahedron not only holds the Divine Feminine-Masculine template that can be absorbed into physicality, but it also brings Unity and Equilibrium into the world of form. All parts of us are being unified, the physical as well as the nonphysical, through the mental-emotional body. Now you're beginning to replace every thought and every emotion and replace them with the Thoughts that emanate from the Mind of Source. Your emotions reflect Unity through Joy, Harmony, and Ecstasy.

Now during the 6th Session, we went through an Initiation that was seating the Unity Template into ourselves at both the physical and nonphysical level, and into the Earth, and also sharing it with the Elementals. First was a first step for a major shift for all of humanity, individually as well as collectively.

So that's just a brief review.

[16:16] JOHN: Now for the next part of our program, we would like you to share with us, the group, what has happened to you since our last session, so that we can all learn from each other. We know this is difficult because words are never adequate in such a refined energetic experience. However the entire collective group will benefit from your sharing.

After that session, Joan will bring forth our host for the evening, which is the combination of Yeshua and Master Kuthumi. Once we are done with this part, they will both be with us to take us to the next step. Because of the energy work that they will be doing, they've asked that we end the session when they have finished their part. This will give us a chance to sit in this new energy.

We feel we have been blessed to have so many wonderful guides with us during these sessions. I know all of us are very grateful.

.....
[Comments on upcoming programs from Joan and John were not transcribed]

[18:18] JOAN: I'd like to make a comment, this is Joan....

For me, it has been so expansive over this last couple of months in my ability to hold a state of consciousness in regards to my Unity with Source -- just seeing that in a whole new Light. And I also feel like the energies, especially since the Summer Solstice started and all of the alignments that have taken place over the last few months, just reinforces that.

I've had some feedback from people who say that they get very emotional, and that they do have these awarenesses. And part of the things that, it doesn't worry them, but they've noticed that things that used to trigger them or that they thought were important aren't important, and they just navigate in a very neutral state. But they kind of are fearful that they have lost the passion for life. And our guidance tells us that you haven't but you are in a transitory space right now, where you're dropping all of that 3rd dimensional baggage, whether it's conscious or not, and that this neutral space is a resting space, so that you can step up and integrate these more refined states of consciousness.

So that's kind of what I've noticed and it's kind of some of the feedback that I have gotten.

.....
[Comments from class members were not transcribed]

[33:00] MEDITATION WITH YESHUA-KUTHUMI, through JOAN:

Greetings, Beloveds, I have come from the vast regions of Prime Creator, from a Collective Consciousness that has joined with the Collective Consciousness of each of you together in form, uniting through the vastness of your Being with this Collective Consciousness.

I come as a spokesperson for this Collective Energy. It is I, Yeshua. I have come in the merged state with Master Kuthumi. But I have also come in the Presence of that Feminine Triad -- Anna, Mother Mary, and the Magdalene – so that we might together create even more refinement in the energy system of humanity and Earth.

Archangel Gabriel began to set the template for this evening's energy work in regards to joining the nonphysical chakras and the physical chakras. We would like, this evening, to work with this energy, this very refined, unified energy, to further integrate it into the physicality. For it is your Collective Consciousness that is embodied, as the individual expressions of Prime Creator, that is the prime source for seeding this Unity Consciousness on the Earth. It is through your interface, from the vastness of who you are, in Unity with your Source, that that becomes a very real positioning in the world of form.

Unity Consciousness has been very misunderstood. Humanity does not have the awareness that in that Unity Consciousness you are never separate from your Source, and you are never separated from Undifferentiated Love or Light – because it is who you are.

So I'd like to begin now by encouraging each one of you to gather in your Collective Crucible of Love, in your Sacred Heart, vibrating in the vastness of your Being, in that refined state of a vehicle of Light, emanating from Prime Creator, in its perfection...

Now from this Crucible of the Sacred Heart, be aware of the Presence of the Holy Spirit, that Divine aspect of your Source that has entered into the state of form through the Sacred Heart, through each one of you, individually and collectively.

Feel the expansiveness of this state of consciousness.....

Feel the vibration of Light that is present, expanding, extending, encompassing.....

In this state of consciousness, see that beautiful Star Tetrahedron, that luminous White that is composed of every Color Code, every Sound frequency, every Divine Thought that is thought in the Mind of Source.....

The emotion that emanates from your Heart chakra is almost overwhelming, as you bring this Thought into the physical body, healing the mental-emotional body, bringing Unity to this most important body of you, as you reside in form.

Oh, Beloved, it was so fragmented, but now look at its Beauty, as the Thought of Prime Creator, through the Holy Spirit, enters the mental-emotional body, healing, nourishing, bringing Unity to this body that was so in distress. Feel the Joy that is emanating from your emotions; experience the Ecstasy of your emotions. This Ecstasy magnifies, refines the vibrations of your mental-emotional body. It is no longer in distress, for it has been set free by you in the Presence of the Holy Spirit, because you have actively unified this body. The Joy that you feel is like no other feeling that you have ever felt...

[42:54] This will be a reference point, so that you might know the Joy of being Divine. And as you create from this moment forward, in this new vibratory level of your mental-emotional body, that is now unrestrained by any fragmentation, you will know without any doubt, through this experience, you are Divine, you are unified with Prime Creator. From this moment into eternity, regardless of any embodiment that you might take, this state of consciousness is yours.

You have taken a huge step in reclaiming your Christed nature... as you are embodied in the world of form... knowing always that you are a Christed Being. And as a Christed Being, you navigate, you create from the perfection of your Source. For truly, there was never any separation between your Spirit and Source... This recognition of your consciousness will assist you in the coming times to create precisely and to hold that vast energetic, Christed Energetic, that will be given to all humanity.

You have also expanded the Christed Matrix within your Heart, your Sacred Heart, and within the Earth. The Elementals have joined with you and share your Joy, for these Beloved Beings are also unified with you in this Christed expression...

[48:11] Consider what has just occurred: the healing of the fragmentation of your mental-emotional body, the unification of your body and your consciousness as Spirit in form. And because you are in that form, you share this consciousness with Mother Earth and the Elementals.

From this moment forward, you will co-create through Christ Consciousness with the elements that are part of your body, of form, and also unified with Earth. So a great collaboration has been created in the realm of form, in the individual expression in the body, in the Earth, in the elements...

[50:10] What a huge service you are now providing to not just the Earth, but to the Cosmos... You have begun to create a Cosmic Womb within your body, from which Christ Consciousness will be birthed in all realms of form, throughout the Cosmos. You hold that spark of Undifferentiated Light within the womb of your Being, in a body, regardless whether you have a masculine form or a feminine form of body.

That womb is an eternal energetic orifice that is being created within the body of you humans. It is in the embryonic stages, but just as you created this Crucible of Love in the Sacred Heart, you created the Sacred Heart, you now create this Womb that will nurture the embryo of Christ Consciousness to grow, to develop. You will feed it and you will nourish it through your Christed Consciousness. You will grow it into fruition, so that consciousness from this moment forward will be present in every human form, in every nonhuman form within the Cosmic Realms of Creation, because of what you have done for yourself at this moment, as you have joined in a Collective Consciousness of this Holy Crucible that you created. And we have merged with you in this Holy Crucible...

[54:15] So you have a Crucible of Christed Consciousness in your Sacred Heart; you have a Crucible or a Cosmic Womb within your body to develop a Christed Being in a body. This is a massive Thought that emanates from the Mind of Prime Creator, that we have co-facilitated into its Presence within your consciousness and within your body. The massiveness of this experience cannot be described; you can only experience it, as you are in this moment.

Sit in this very refined vibratory Crucible and experience it.

It matters not about the length of time; it only matters that you allow yourself to experience fully what you have just created.

Visit this consciousness often, so that you might know, without reservation...

In the Holiness of our Being, and in the Holiness of your Being, we sit together in our Christed Image, in complete Unity, in complete Undifferentiated Love and Light...

Blessings! [58:08]
